Make Your Own Monstrosities With Tooth:

Monsters, Monstrosities, and the Monstrous in Culture and Society Diego Compagna, Stefanie Steinhart, 2020-01-28
Existing research on monsters acknowledges the deep impact monsters have especially on Politics Gender Life Sciences Aesthetics and Philosophy From Sigmund Freud's essay The Uncanny to Scott Poole's Monsters in America previous studies offer detailed insights about uncanny and immoral monsters. However our anthology wants to overcome these restrictions by bringing together multidisciplinary authors with very different approaches to monsters and setting up variety and increasing diversification of thought as guiding patterns. Existing research hints that monsters are embedded in social and scientific exclusionary relationships but very seldom copes with them in detail. Erving Goffman's doesn't explicitly talk about monsters in his book Stigma but his study is an exceptional case which shows that monsters are stigmatized by society because of their deviations from norms but they can form groups with fellow monsters and develop techniques for handling their stigma. Our book is to be understood as a complement and a further development of previous studies. The essays of our anthology pay attention to mechanisms of inequality and exclusion concerning specific historical and present monsters based on their research materials within their specific frameworks in order to create engaging constructive critical and diverse approaches to monsters even utopian visions of a future of societies shared by monsters. Our book proposes the usual view that humans look in a horrified way at monsters but adds that monsters can look in a critical and even likewise frightened way at the very societies which stigmatize them.

Maternity, Monstrosity, and Heroic (Im)mortality from Homer to Shakespeare Sara Burdorff, 2025-10-01 This work uses an adaptation of monster theory to rethink the foundations of epic heroic immortality. Rather than focusing on a specific monster or monsters the author identifies the belly monstrous as a crucial point of intersection between mothers and warriors in traditional narratives of the Trojan War. Identifying the gestating digesting belly as the center of the Iliadic world this groundbreaking approach disrupts androcentric readings of

the Iliadic warrior and his ethos emphasizing the crucial role of female suffering in the generation and preservation of immortal legacy The author reconsiders ancient Greek depictions of the Trojan War and its aftermath including Homeric epic and the tragedies of Aeschylus and Euripides and illuminates the cohesive patterning of Shakespeare's mother warrior plays which place inherited Iliadic belly monstrous motifs in conversation with cultural anxieties of late Elizabethan England With meticulous scholarship and captivating analysis Maternity Monstrosity and Heroic Mortality from Homer to Shakespeare redefines the relationship between mothers and warriors in the Iliadic heroic ideal paving the way for new interpretations of war grief and immortal glory in a broad range of literary and cultural contexts **Beauty and Monstrosity in Art and Culture** Chara Kokkiou, Angeliki Malakasioti, 2024-04-23 This edited volume takes a new look at an old question what is the relationship between beauty and monstrosity How has the notion of beauty transformed through the years and how does it coincide with monstrous ontologies Contributors offer an interdisciplinary approach to how these two concepts are interlinked and emphasize the ways the beautiful and the monstrous pervade human experience The two notions are explored through the axis of human transformation focusing on body identity and gender while questioning both how humans transform their body and space as well as how humans themselves are gradually transformed in different contexts The pandemic gender crisis moral crisis sociocultural instability and environmental issues have redefined beauty and the relationship we have with it Exploring these concepts through the lens of human transformation can yield valuable insights into what it means to be human in a world of constant change The book will be of interest to scholars working in art history archaeology philosophy architecture and cultural studies **Solar Homes and Sun Heating** George Emery Daniels, 1976
