Makers Of Modern Nuclear Strategy:

The New Makers of Modern Strategy Hal Brands, 2023-05-02 The essential resource on military and political strategy and the making of the modern world The New Makers of Modern Strategy is the next generation of the definitive work on strategy and the key figures who have shaped the theory and practice of war and statecraft throughout the centuries. Featuring entirely new entries by a who's who of world class scholars this new edition provides global comparative perspectives on strategic thought from antiquity to today surveying both classical and current themes of strategy while devoting greater attention to the Cold War and post 9/11 eras. The contributors evaluate the timeless requirements of effective strategy while tracing the revolutionary changes that challenge the makers of strategy in the contemporary world. Amid intensifying global disorder the study of strategy and its history has never been more relevant. The New Makers of Modern Strategy draws vital lessons from history's most influential strategists from Thucydides and Sun Zi to Clausewitz, Napoleon, Churchill, Mao, Ben Gurion, Andrew Marshall, Xi Jinping, and Qassem Soleimani. With contributions by Dmitry Adamsky, John Bew, Tami Davis Biddle, Hal Brands, Antulio J. Echevarria II, Elizabeth Economy, Charles Edel, Eric S. Edelman, Andrew Ehrhardt, Lawrence Freedman, John Lewis Gaddis, Francis J. Gavin, Christopher J. Griffin, Ahmed S. Hashim, Eric Helleiner, Wayne Wei-siang Hsieh, Seth G. Jones, Robert Kagan, Jonathan Kirshner, Matthew Kroenig, James Lacey, Guy Laron, Michael V. Leggiere, Margaret MacMillan, Tanvi Madan, Thomas G. Mahnken, Carter Malkasian, Daniel Marston, John H. Maurer, Walter Russell Mead, Michael C. C. Morgan, Mark Moyar, Williamson Murray, S. C. M. Paine, Sergey Radchenko, Iskander Rehman, Thomas Rid, Joshua Rovner, Priya Satia, Kori Schake, Matt J. Schumann, Brendan Simms, Jason K. Stearns, Hew Strachan, Sue Mi Terry, and Toshi Yoshihara.

The New Makers of Modern Strategy Hal Brands, 2023-05-02 First published by Princeton in 1943 the collection of essays that constituted Makers of Modern Strategy has largely held the field as the key book that studied the means and ends of military power and thought and the historical figures that shaped that history. The books in two editions have long been a staple of Princeton's backlist in international politics and strategic studies. The first edition edited by Edward Mead Earle and subtitled Military Thought from Machiavelli to Hitler emerged out of a seminar of foreign policy and security experts organized between Princeton and the Institute of Advanced Study in reaction to World War II as a global conflict. The subsequent edition edited by Peter Paret then at Stanford University was prepared in the early 1980s and subtitled From Machiavelli to the Nuclear Age. In that edition three essays were reprinted from the earlier book, four others were revised and the remainder twenty-two essays were wholly new to reflect the updates in the field and also how the global political context had changed. The two books together are regarded as the founding and leading text in military and strategic studies containing influential essays by many of the best known scholars of the subject. The ambition of the new volume is to commission an entirely new edition of this classic reference work with 37 chapters organized into 5 sections covering key military leaders and the most important elements of strategic thinking since Thucydides and Sun Tzu.

The field of strategic and military history has witnessed an intellectual renaissance in recent decades as the number of strategic challenges faced by the world has grown enormously International politics has also changed The Cold War ended and the Soviet Union disappeared The United States entered a period of unipolarity only to see it challenged by the rise of new powers China in particular Terrorism civil wars so called rogue states insurgency and counter insurgency and cybersecurity all joined a growing list of strategic concerns New technologies promise to upend our understanding of conflict Furthermore scholars have learned more about earlier periods from the classic thinkers of strategy to the struggles of great power war to the dynamics of world politics during the Cold War Finally scholarship on international politics war and peace in the 20th century and after has become increasingly internationalized with the opening of new archives and the incorporation of new perspectives The aim of this volume is to serve as an overview and stimulant to research in this field one that encompasses the broader definitions of strategy in current research reflects the current state of world politics and also takes a more global and less Western perspective Publisher s description

Makers of Modern Strategy from Machiavelli to the Nuclear Age Peter Paret,Gordon A. Craig,Felix Gilbert,2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present Makers of Modern Strategy from Machiavelli to the Nuclear Age takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are reprinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie s understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

Justifying Ballistic Missile Defence Columbia Peoples,2010

Examines the ways in which views of technology have been used in debates over ballistic missile defence **Makers of Nuclear Strategy** John Baylis, John Garnett, 1991 This book deals with the very foundations of contemporary strategic studies in that it examines the ideas of nine leading strategic thinkers over the past four decades within the context of current debates on nuclear strategy **After Clausewitz** Antulio J. Echevarria (II), Antulio Joseph Echevarria, 2000 But Echevarria disputes this traditional view and convincingly shows that these theorists Boguslawski Goltz Schlieffen Hoening and their American and European counterparts were not the architects of outmoded theories In fact they duly appreciated the implications of the vast advances in modern weaponry as well as in transportation and communications and set about finding solutions that would restore offensive maneuver to the battlefield **BOOK JACKET** *Strategy for Chaos* Colin Gray, 2004-08-02 The remit of this study is to encourage further studies that make an honest and successful effort to achieve synergy between social science and history when analysing the impact of revolutions in military affairs **RMA's Reader's Guide to Military History** Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations *The Cold War U.S. Army* Ingo Trauschweizer, 2008 Focuses on the Seventh Army in West Germany the largest and best prepared field army ever deployed by the U S in peacetime to show how the U S army redefined its identity structure and mission in order to avoid obsolescence during the Cold War era of nuclear weapons and air power **The Emerging Shield** Kenneth Schaffel, 1991 *Quest for Decisive Victory* Robert Michael Citino, 2002 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign But by the mid 19th century the emergence of massive armies and advanced weaponry and the concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory Great battles had become curiously indecisive decisive campaigns virtually impossible **Decoding Clausewitz** Jon Tetsuro Sumida, 2008 A pathbreaking critique of the thought of military studies icon Carl Phillip Gottfried von Clausewitz and his magnum opus *On War* that illuminates why and how that work should be viewed as much more mature coherent innovative and complete than suggested by previous accounts **The First Summit** Theodore A. Wilson, 1991 Four months before Pearl Harbour Winston Churchill and Franklin D Roosevelt met in secret aboard a ship in a secluded Newfoundland harbour This was the first summit conference of World War II **Inside Hitler's High Command** Geoffrey P. Megargee, 2000 Challenging previous accounts Megargee shatters the myth that German generals would have prevailed in World War II if only Hitler had not

meddled in their affairs Instead he observes that the military's strategic ideas were no better than Hitler's and often were worse 20 photos **General Walter Krueger** Kevin C. Holzimer,2007 A military biography of the general who led the U S Sixth Army in the Southwest Pacific in World War II including grueling jungle campaigns in New Britain and New Guinea and who was subsequently chosen by General MacArthur to lead the ground invasion of both the Philippines and Japan

Strategies of Individuals Laure Paquette,2002 Strategy the unifying and guiding idea behind complex series of actions aiming to change the distribution of power seemed to explain the unusual successes of Franklin Roosevelt Martin Luther King or Winston Churchill to name a few However strategy as an idea was only mentioned explicitly in military literature The pursuit of this concept and its great possibilities led to a series of overlaps Strategy was within strategic studies strategic studies was within international security international security was within international relations international relations were inside political science It was sociology of action a fundamental approach to the social sciences that guided this long investigation of strategy The literature on strategy is silent on anything pertaining to the individual unless that individual is a soldier Strategic analysis the more widely used concept is the process of examining problems with the ultimate aim of solving them Strategic thought on the other hand is a field with more breadth and more depth It is more theoretical using higher degrees of abstraction and encompassing research into strategy Unlike strategic analysis however there are no established methods of theory building This book is about how certain extraordinary individuals came to make changes and meet great challenges to show how their methods are available to any of us Cooperative Models in International Relations Research Michael D. Intriligator,Urs Luterbacher,1994-06-30 Cooperative Models in International Relations Michael D Intriligator and Urs Luterbacher Cooperation problems in international relations research have been associated with a variety of approaches Game theoretical and rational choice perspectives have been used extensively to analyze international conflict at a bilateral two actor level Problems of deterrence and conflict escalation and deterrence maintaining and conflict dilemma solving strategies have been studied with a variety of game theoretical constructs These range from two by two games in normal form Axelrod 1984 to sequential games It is obvious that the analysis of conflict solving strategies and metastrategies deals implicitly and some times explicitly with cooperation The emphasis on cooperation promoting strategies plays therefore an important role within rational choice analysis of two actor problems However problems of international cooperation have also been traditionally associated with literary and qualitative approaches This is especially true for studies carried out at a multilateral or systemic level of analysis The association between cooperation problems at the international level and the study of international organizations influenced by the international legal tradition have certainly contributed to this state of affairs The concept of international regime of cooperation Krasner 1983 which derives itself from legal studies has been developed entirely within the context of this literary 1 2 COOPERATIVE MODELS IN INTERNATIONAL RELATIONS RESEARCH conception However as such studies evolved various authors tended to use more formal constructs to justify

their conclusions and to refine their analyses **Arming Against Hitler** Eugenia C. Kiesling, 1996 In May/June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead. While many historians have focused on France's failure to avoid this catastrophe, Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies, military doctrine and combat forces would preserve the nation.

Lives of Hitler's Jewish Soldiers Bryan Mark Rigg, 2009 They were foot soldiers and officers. They served in the regular army and the Waffen SS. And remarkably they were also Jewish at least as defined by Hitler's infamous race laws. Pursuing the thread he first unraveled in Hitler's Jewish Soldiers, Bryan Rigg takes a closer look at the experiences of Wehrmacht soldiers who were classified as Jewish. In this long awaited companion volume he presents interviews with twenty one of these men whose stories are both fascinating and disturbing. As many as 150 000 Jews and partial Jews or Mischlinge served often with distinction in the German military during World War II. The men interviewed for this volume portray a wide range of experiences: some came from military families, some had been raised Christian, revealing in vivid detail how they fought for a government that robbed them of their rights and sent their relatives to extermination camps. Yet most continued to serve since resistance would have cost them their lives and they mistakenly hoped that by their service they could protect themselves and their families. The interviews recount the nature and extent of their dilemma, the divided loyalties under which many toiled during the Nazi years and afterward, and their sobering reflections on religion and the Holocaust, including what they knew about it at the time. Rigg relates each individual's experiences following the establishment of Hitler's race laws, shifting between vivid scenes of combat and the increasingly threatening situation on the home front for these men and their family members. Their stories reveal the constant tension in their lives, how some tried to hide their identities and how a few were even Aryanized as part of Hitler's effort to retain reliable soldiers, including Field Marshal Erhard Milch, three star general Helmut Wilberg and naval commander Bernhard Rogge. Chilling, compelling, almost beyond belief, these stories depict crises of conscience under the most stressful circumstances. *Lives of Hitler's Jewish Soldiers* deepens our understanding of the complex intersection of Nazi race laws and German military service both before and during World War II.

Makers Of Modern Nuclear Strategy: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have charmed audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Makers Of Modern Nuclear Strategy : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
