## **Making Economic Policy:**

*The Making of Economic Policy* Avinash K. Dixit, 1998-09-01 The Making of Economic Policy begins by observing that most countries trade policies are so blatantly contrary to all the prescriptions of the economist that there is no way to understand this discrepancy except by delving into the politics The same is true for many other dimensions of economic policy Avinash Dixit looks for an improved understanding of the politics of economic policy making from a transaction cost perspective Such costs of planning implementing and monitoring an exchange have proved critical to explaining many phenomena in industrial organization Dixit discusses the variety of similar transaction costs encountered in the political process of making economic policy and how these costs affect the operation of different institutions and policies Dixit organizes a burgeoning body of research in political economy in this framework He uses U S fiscal policy and the General Agreement on Tariffs and Trade GATT as two examples that illustrate the framework and show how policy often deviates from the economist's ideal of efficiency The approach reveals however that some seemingly inefficient practices are quite creditable attempts to cope with transaction costs such as opportunism and asymmetric information Copublished with the Center for Economic Studies and the Ifo Institute *The Making of United States International Economic Policy* Stephen D. Cohen, 1988 **A Year Inside the Beltway** Sue Headlee, 2002-07-30 American domestic and international economic policymaking is a sometimes bewildering mixture of economic expertise and political interests Headlee elucidates the pivotal debates of the 2000 2001 economic policymaking cycle by walking readers through the major institutions and introducing the key actors involved A section on domestic policy starts with a chapter on the state of the U S economy followed by chapters on making fiscal policy monetary policy and labor policy Each of these chapters on making policy is illustrated by case studies on Social Security reform the Federal Reserve as financial crisis manager and women and the economy The international policy section starts with a chapter on the state of the global economy followed by chapters on making trade policy international monetary and financial policy at the U S Treasury reforming the IMF and the economic development of China A useful introduction to the ins and outs of beltway policymaking for students of economics politics and policymaking *The Making of Economic Policy* Paul Mosley, 1984-06-15 This is a thorough and persuasive study which summarizes existing literature and draws on hitherto unpublished material It will be invaluable for anyone interested in economics and politics Paul Mosley shows how the job has been tackled by the governments of Britain and the United States **The Politics of American Economic Policy Making** Paul Peretz, 2016-09-16 A reader on American government and the economy It contains wide ranging articles by people such as Richard Musgrave Milton Friedman James Buchanan and Alan Greenspan *U.S. Economic Policymaking* United States. Congress. Joint Economic Committee, 1990 **American Economic Policy in the 1990s** Jeffrey A. Frankel, Peter R. Orszag, 2002 An examination of U S economic policy in the 1990s by leading policy makers as well as academic economists *The Political Power of Economic Ideas* Peter A. Hall, 2020-11-10

John Maynard Keynes once observed that the ideas of economists and political philosophers both when they are right and when they are wrong are more powerful than is commonly understood. The contributors to this volume take that assertion seriously. In a full scale study of the impact of Keynesian doctrines across nations their essays trace the reception accorded Keynesian ideas initially during the 1930s and then in the years after World War II in a wide range of nations including Britain, the United States, France, Germany, Italy, Japan and Scandinavia. The contributors review the latest historical evidence to explain why some nations embraced Keynesian policies while others did not. At a time of growing interest in comparative public policy making they examine the central issue of how and why particular ideas acquire influence over policy and politics. Based on three years of collaborative research for the Social Science Research Council, the volume takes up central themes in contemporary economics, political science and history. The contributors are Christopher S. Allen, Marcello de Cecco, Peter Alexis Gourevitch, Eleanor M. Hadley, Peter A. Hall, Albert O. Hirschman, Harold James, Bradford A. Lee, Jukka Pekkarinen, Pierre Rosanvallon, Walter S. Salant, Margaret Weir and Donald Winch.

*Striking a Balance* Albert Rees, 1984. Textbook on the goals and institutional framework of economic policy in the USA from 1946 to 1983. Discusses political aspects of full employment, price stabilization, economic growth, income redistribution and the balance of payments. Explains the role of fiscal policy, public expenditure, public borrowing, monetary policy, wage policy, price policy, state intervention, public ownership and trade policy. Graphs, references.

*Making Economic Policy* Joseph A. Pechman, 1976. *The Politics of American Economic Policy Making* Paul Peretz, 1987-01-01. *Making Economic Policy* Carl Lieberman, 1991. *The Making of Economic Policy* Steven M. Sheffrin, 1991.

**Political Economy of Economic Policy** Wilfred L. David, 1988-09-02. David takes as his point of departure the orthodox rational paradigm of public policy making which he argues does not adequately reflect real world process to present an integrated model for economic policy formulation and execution. By juxtaposing the theoretical foundations of the rationalist model with insights drawn from alternative systems of political economy he shows how economic decisionmaking is both more complex and less idealistic than the rational paradigm assumes. In constructing his argument David systematically integrates ideas drawn from moral philosophy, politics, sociology, systems theory, institutional and neo-Marxian economic thought and international dimensions of political economy. He suggests a reorientation of theory and analysis based on an approach emphasizing the role of values, conflicts, power and divergent interests in the decisionmaking process. Focusing throughout on questions raised by the rationalist model, David builds his analysis around issues such as the validity of the dominant theories of public economic decision making, the logical vis a vis ideological foundations of economic policy, postulates the extent to which decisions can be made more responsive to values pertaining to human development.

*Federal Reserve Policy-making* George Leland Bach, 1950. *The City of London and Social Democracy* Aled Davies, 2017-06-15. *The City of London and Social Democracy* examines the relationship between the financial sector and the state in post-war Britain. The key argument made in Aled Davies's study is that changes to the

financial sector during the 1960s and 1970s undermined the state's capacity to sustain and develop a modern industrial economy. Social democratic economic strategy was constrained by the institutionalization of investment in pension and insurance funds, the fragmentation of the nation's oligopolistic domestic banking system, the emergence of an unregulated international capital market based in London, and the breakdown of the Bretton Woods international monetary system. Novel attempts to reconfigure social democratic economic strategy in response to these changes ultimately proved unsuccessful. Meanwhile, the assumption that national prosperity could only be achieved through industrial growth was challenged by a reconceptualization of Britain as a fundamentally financial and commercial nation, an idea that was successfully promoted by the City itself. These findings assert the need to place the Thatcher government's subsequent neoliberal economic revolution, which saw the acceleration of deindustrialization and the triumph of the City of London as a pre-eminent international financial centre, within a broader material, institutional, and cultural context previously underappreciated by historians.

Presidential Economics Herbert Stein, 1994. This book examines the events, policies, and personalities that have shaped our economy for a half century. *Historical Perspectives on Macroeconomics* Philippe Fontaine, Albert Jolink, 2005-08-12. Since the publication of Keynes's *General Theory of Employment, Interest, and Money* in 1936, macroeconomic theory has altered considerably. Each author in this volume focuses on an issue which either preceded, accompanied, or followed the Keynesian Revolution and helped to shape economics in subsequent years. Contributors reconsider some of the major concepts of the *General Theory*: unemployment and the identity of income and output. They also highlight some of the controversies in macroeconomic theory and review the macroeconomic policy implications and consequences.

CoreEconomics Eric Chiang, 2013-12-09. With this new edition, Eric Chiang transforms CoreEconomics into a text/media resource well attuned to today's students. Long active in the economics education community, Chiang brings a contemporary teacher's perspective to the book, supporting a variety of learning approaches by introducing modern topics, new pedagogy, a more visual presentation, and well-integrated media tools. All this while maintaining the book's defining focus on just those topics instructors cover most often in the course. *How Presidents Make Economic Policy* Raymond Tatalovich, Robert Aduddell, 1992-01.
