Making It With Music:

Making Music George Martin, 1983 **Making Music** Dennis DeSantis, 2015 **Making Time for Making Music** Amy Nathan, 2018 Are you a former music maker who yearns to return to music but aren't sure where to begin Or are you a person who never played music as a child but you are now curious about trying You're not alone Many adults who used to play an instrument haven't touched it in years because either they can't find the time to practice are afraid their skills are too rusty or are unsure of what kind of group they could join Others are afraid to sing or start playing an instrument because they received negative feedback from childhood experiences Performing practicing and composing music may seem like unattainable goals with insurmountable obstacles for busy adults with non-musical careers **Making Time for Making Music** can help adults find ways to make music part of their lives The first book of its kind it is filled with real-life success stories from more than 350 adults who manage to fit music making into their jam-packed schedules They polished rusty skills found musical groups to join and are having a great time Their testimonies prove that you are never too old to learn to make music and that there are numerous musical paths to explore Featuring advice from dozens of music educators health-care professionals and music researchers who point out that making music can even be good for your health as well as an extensive resource list of websites organizations and summer programs this book offers inspiration and tried-and-true strategies for anyone who wishes to return to music making or begin as an adult **Any Sound You Can Imagine** Paul Th  berge, 1997-06-23 Describes digital musical instruments industries that supply and promote them and the meanings they have for musicians Winner of the International Association for the Study of Popular Music IASPM Book Award 1997 Recent innovations in musical instrument design are not simply a response to the needs of musicians writes Paul Th  berge they also have become a driving force with which musicians must contend He argues that digital synthesizers samplers and sequencers in studio production and in the home have caused musicians to rely increasingly on manufacturers for both the instruments themselves as well as the very sounds and musical patterns that they use to make music Musical practices have thus become allied with a new type of consumer practice that is altogether different from earlier relationships between musicians and their instruments as a means of production Th  berge places these developments within a broad social and historical perspective that examines the development of the musical instrument industry particularly the piano industry the economic and cultural role of musicians magazines and computer networks and the fundamental relationships between musical concepts styles and technology **Making Music in Montessori** Michael Johnson, 2020-11-21 Infused with a warm affable tone **Making Music in Montessori** is the Guide's guide to music education providing Montessori teachers all at once a snappy practical handbook music theory mentor pedagogical manual and resource anthology The book's goal To give teachers confidence in music so that when their children walk away from a lesson all fired up to compose their own music their teacher will know how to guide them Before **Making Music in Montessori** teachers may have only dreamed of a
