## **Making Of Cities:**

The Art of City Making Charles Landry,2012-05-16 City making is an art not a formula The skills required to re enchant the city are far wider than the conventional ones like architecture engineering and land use planning There is no simplistic ten point plan but strong principles can help send good city making on its way The vision for 21st century cities must be to be the most imaginative cities for the world rather than in the world This one change of word from in to for gives city making an ethical foundation and value base It helps cities become places of solidarity where the relations between the individual the group outsiders to the city and the planet are in better alignment Following the widespread success of The Creative City this new book aided by international case studies explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration It explores the deeper fault lines paradoxes and strategic dilemmas that make creating the good city so difficult

*Making Cities Resilient* Vishwa Raj

Sharma,Chandrakanta,2019-02-08 As the world has transformed so have cities Today cities are home to 54 percent of the world s population and by the middle of this century that figure will likely rise to 66 percent According to the United Nations UN Habitat I 1972 Habitat II 1996 and Habitat III 2016 summits cities are facing many serious challenges including growing inequality security concerns and the worsening impacts of climate change Uncontrolled urbanization has led to many problems haphazard growth of areas emergence of slums inadequate water and power supply poor sanitation shortage of transport and other civic amenities shrinking green spaces pollution crime and urban disaster risks such as fire flood road and industrial accidents etc Worldwide communities at the international national and local level are continuously working to improve human habitats In order to make our planet more sustainable the UN has moved from the Millennium Development Goals MDG to the Sustainable Development Goals SDG Among the latter the aim of SDG 11 is to make cities and human settlements inclusive safe resilient and sustainable In light of these challenges various terms have emerged to help understand urban issues Visualizing the problem the United Nations program Making Cities Resilient is focused on mitigating the disaster risk in urban areas This book analyzes terms such as sustainable resilient livable inclusive smart and world class city which have emerged in the process of combating urban challenges in today s world The book addresses emerging concepts for cities challenges and potentials urban environments health and planning policies Covering 14 large cities in India as well as case studies from Japan Singapore Thailand Malaysia Poland and Sweden it provides a regional dimension to and micro level perspective on urban issues
