It has been reported that a burglary now happens every 15 seconds As such the chances of your own home actually being at risk from a break in are greatly increased and it does not matter where you live

When people think of a break in they think of someone gaining entry into their home through breaking some glass or smashing down doors Yet

there are certain things which could actually extend an invitation to those intruders to make an attempt at getting into your home

There are many places which are vulnerable to attack by an intruder to your home and therefore you must set up a routine which will provide them with less opportunities of attempting to break in Below we look at what are considered to be

some of the weak areas in your home security routine which could help to prevent any kind of break in from occurring

1 Keys You may think it is a great idea but lending keys to family and friends as well as those people who carry out work in your home greatly increases the chances of your keys being placed in the wrong hands

Although the people you leave the key with might be completely trustworthy you cannot control where the keys are once they are out of your hands and the chances of

their being duplicated are greatly increased So it is important that you think deeply about whom you are leaving your keys with

Also never place your keys in those secret places outside the home as a smart burglar may know exactly where to look
