Make: Maverick Scientist Forrest M. Mims, 2024-02-14 *Maverick Scientist* is the memoir of Forrest Mims who forged a distinguished scientific career despite having no academic training in science Named one of the 50 Best Brains in Science by Discover magazine Forrest shares what sparked his childhood curiosity and relates a lifetime of improbable dramatic and occasionally outright dangerous experiences in the world of science At thirteen he invented a new method of rocket control At seventeen he designed and built an analog computer that could translate Russian into English and that the Smithsonian collected as an example of an early hobby computer While majoring in government at Texas A M University Forrest created a hand held radar like device to help guide the blind And during his military service he had to be given special clearance to do top secret laser research at the Air Force Weapons Lab Why Because while he lacked the required engineering degree they wanted his outside the box thinking on the project He went on to co found MITS Inc producer of the first commercially successful personal computer wrote a series of electronics books for Radio Shack that sold more than seven million copies and designed the music synthesizer circuit that became known as the infamous Atari Punk Console All this came before he started consulting for NASA s Goddard Space Flight Center and NOAA s famous Mauna Loa Observatory and earning the prestigious Rolex Award This intimate portrait of a self made scientist shares a revelatory look inside the scientific community and tells the story of a lifelong learner who stood by his convictions even when pressured by the establishment to get in line with conventional wisdom With dozens of personal photos and illustrations *Maverick Scientist* serves as proof that to be a scientist you simply need to do science

Beyond the Saga of Rocket Science Walter Sierra, 2016-12-19 *Beyond the Saga of Rocket Science* is a series of four closely related books that provide an amply illustrated overarching perspective to a broad nontechnical audience of the entire panorama surrounding the development of rockets missiles and space vehicles as we know them today and what the exciting future holds The books are sequential and form an integrated whole *The Dawn of the Space Age* *Avoiding Armageddon* *In Space To Stay* *The Never Ending Frontier* *The Dawn of the Space Age* begins with exciting tales of the earliest developers of rudimentary rockets and the deadly battles they fought in China between 228 and 1600 A D A historical fiction approach brings long ago characters and events to life Palace intrigues treachery and warmongering are

interwoven with vivid depictions of courage and bravery to showcase the gradual progression of the science of rocketry from fireworks displays to effective weapons in the battlefield Readers in the West will learn something about the Eastern mindset where over half the worlds population lives today The tremendous achievements of the Wright Brothers Wilbur and Orville in the early 1900s serve as a useful backdrop for showcasing the difficulties in developing completely new technologies for practical use The Wright Brothers had to go abroad to France before World War I to garner enough support and funding to mature airplane science to the point that the U S Army took notice Building on the Wrights successes Ludwig Prandtl in Germany and Theodore von Krmn in the United States made pioneering developments in aerodynamics which are crucial to rocket flight The invention of the airplane inspired early innovators in the 1920s 1930s to lay the foundation for the giant aerospace conglomerates of today including William Boeing Boeing Company Allan Loughead and Glenn Martin Lockheed Martin Jack Northrop and Leroy Grumman Northrop Grumman James McDonnell and Donald Douglas McDonnellDouglas These stalwarts were very foresighted and willing to take calculated risks The ingenious Dr Robert Goddard inventor of the modern rocket developed a sound theory and conducted pioneering flight tests in the 1920s 1930s while overcoming many failures However Goddards rockets were not taken seriously enough in the United States to enable the development of practical missiles and launch vehicles But Germany sure took notice World War II gave the biggest impetus ever to advancing rocket science and related technologies The Nazi war machine funded Dr Wernher von Braun and his cohorts to develop rocketdriven weapons such as the V1 and V2 which killed thousands during World War II Fortunately for America von Braun and key members of his team decided to seek asylum in the United States when the war ended Now the country took up the engineering of rockets in earnest Von Braun went on to lead the American space program during the crucial decades of the 1950s 1960s He did more to advance missiles rockets spaceflight and enable manned landings on the moon than anybody else in America Six astronauts flew solo on six Project Mercury flights 1961-1963 Three of them joined another 13 astronauts to orbit Earth on 10 twoperson Project Gemini flights 1965-1966 Without a single failure The Soviet Union captured their fair share of German rocketeers including the influential Helmut Grttrup They learned everything possible from the German expatriates Then they cast the Germans aside and undertook rocket and missile development using indigenous experts like Sergei Korolyov and Valentin Glushko Like von Braun Korolyov was ingenious in his own right and led the development of Soviet rocket science until his untimely death in January 1966 Engineers and scientists are todays unsung heroes They work in the shadows without any public acclaim or recognition yet the technologies they develop touch every facet of our daily lives

A Hand to Turn the Time Theodore D. Kharpertian, 1990. A study of the major fiction of Thomas Pynchon in three contexts: Menippean satire, postmodernism, and American writing. The critical genealogy of the term satire is discussed, and Pynchon's *V*, *The Crying of Lot 49*, and *Gravity's Rainbow* are analyzed. Shadow Command Dale Brown, 2009-03-17. America's most advanced military unit rebels against the very government it's trying to protect in this pulse-pounding military thriller chock-full of suspense, adventure, and high-tech weaponry. Following their success in crushing an Iranian threat, General Patrick McLanahan's new Aerospace Battle Force has grown into a full-fledged task force based on the Armstrong Space Station. But the program has its critics, including Russia, the United Nations, and the American press. Newly elected President Joseph Gardner directs Congress to cut off funding for this provocative force and dismisses McLanahan. What no one knows is that the Russians have blackmailed Gardner: the first step in a nefarious plan to control the world's oil supplies. With the ABF decommissioned, Russia deploys troops and warships into Turkmenistan, Iran, and the Persian Gulf. But McLanahan and his forces refuse to allow the Russian aggression to stand. Defying the civilian chain of command, he orders the ABF to strike their forces. The president orders McLanahan's immediate arrest. But before authorities can throw him in jail, they have to find him. Located at one of the most secure bases with an arsenal of the world's most sophisticated air weapons, he has control of the Aerospace Battle Force and the Armstrong Space Station. Army, Marine Corps, and FBI units converge on the base, but they are easily held off for now. In a race against time, McLanahan must outmaneuver his own countrymen and defeat the Russians and expose the truth.
