Rembrandt Zegers

Making Nature:

Making "Nature" Melinda Baldwin, 2015-08-18 *Making Nature* is the first book to chronicle the foundation and development of *Nature* one of the world's most influential scientific institutions. Now nearing its hundred and fiftieth year of publication, *Nature* is the international benchmark for scientific publication. Its contributors include Charles Darwin, Ernest Rutherford, and Stephen Hawking, and it has published many of the most important discoveries in the history of science, including articles on the structure of DNA, the discovery of the neutron, the first cloning of a mammal, and the human genome. But how did *Nature* become such an essential institution? In *Making Nature*, Melinda Baldwin charts the rich history of this extraordinary publication from its foundation in 1869 to current debates about online publishing and open access. This pioneering study not only tells *Nature's* story but also sheds light on much larger questions about the history of science, publishing, changes in scientific communication, and shifting notions of scientific community. *Nature*, as Baldwin demonstrates, helped define what science is and what it means to be a scientist.

Making Nature Social Rembrandt Zegers, 2024-06-15 As the global climate crisis and biodiversity loss deepen their impact and gain pace, *Making Nature Social: Towards a Relationship with Nature* provides core insights into what it means to understand our relationship to nature. This relationship is illustrated through interviews with people working in different nature practices, including engaging with nature, non-human animals, place advocacy, and with work organization values. Rembrandt Zegers argues that since non-humans do not use human language, meaning is conducted through the senses, giving rise to a knowing that manifests itself through the body first, before finding its way socially in human language. Through these senses, the relation to non-human others and nature can become a conversation; in other words, a relationship built on reciprocity. The book illustrates how these meanings occur and how these conversations happen, how crucial they are, and how they are connected. It dives deep into the essence of the lived experience of our relationship to nature and, in doing so, acknowledges how important the lived experience is for the purpose of a relationship with nature.

Making Nature Whole William R. Jordan, George M. Lubick, 2011-07-26 *Making Nature Whole* is a seminal volume that presents an in-depth history of the field of ecological restoration as it has developed in the United States over the last three decades. The authors draw from both published and unpublished sources, including archival materials and oral histories from early practitioners, to explore the development of the field and its importance to environmental management as well as to the larger environmental movement and our understanding of the world. Considering antecedents as varied as monastic gardens, the Scientific Revolution, and the emerging nature awareness of nineteenth-century Romantics and Transcendentalists, Jordan and Lubick offer unique insight into the field's philosophical and theoretical underpinnings. They examine specifically the more recent history, including the story of those who first attempted to recreate natural ecosystems early in the 20th century, as well as those who over the past few decades have realized the value of this approach not only as a critical element in conservation but also as a context for negotiating the ever
