C., 2021-10-12 Judgment and Leadership presents original thinking and addresses age old concerns regarding the relationship between judgment and leadership These two concepts are inseparable Judgment guides every action that a leader takes and underlies every thought emotion or justification that leaders form This volume extends the study of judgment and leadership across disciplinary and conceptual boundaries **Ethics With Aristotle** Sarah Broadie Professor of Philosophy Princeton University, 1991-01-10 In this incisive study Sarah Broadie gives an argued account of the main topics of Aristotle's ethics eudaimonia virtue voluntary agency practical reason akrasia pleasure and the ethical status of theoria She explores the sense of eudaimonia probes Aristotle's division of the soul and its virtues and traces the ambiguities in voluntary Fresh light is shed on his comparison of practical wisdom with other kinds of knowledge and a realistic account is developed of Aristotelian deliberation The concept of pleasure as value judgment is expounded and the problem of akrasia is argued to be less of a problem to Aristotle than to his modern interpreters Showing that the theoretic ideal of Nicomachean Ethics X is in step with the earlier emphasis on practice as well as with the doctrine of the Eudemian Ethics this work makes a major contribution towards the understanding of Aristotle's ethics **The Ethos of Rhetoric** Michael J. Hyde, 2004 Fourteen noted rhetorical theorists and critics answer a summons to return ethics from abstraction to the particular They discuss and explore a meaning of ethos that predates its more familiar translation as moral character and ethics Together the contributors define ethical discourse and describe what its practice looks like in particular communities

**Organizations** Jan Achterbergh, Dirk Vriens, 2010-09-02 to do to ensure survival and 2 principles for designing organizational structures in such a way that they can realize the required functions adequately In the course of their elaboration we will show that these principles are general i e that they hold for all organizations

1 5 Conceptual Background To describe organizations as social systems conducting experiments and to present principles for designing an infrastructure supporting the social experiment we use concepts from organizational cybernetics social systems theory and Aristotle s ethics In this book we hope to show that concepts from these traditions as introduced by their relevant representatives can be integrated into a framework supporting our perspective on organizations To this purpose we introduce in each of the following chapters relevant concepts from an author belonging to one of these three traditions and show how these concepts contribute to describing organizations as social experiments in Part I of the book to formulating principles for the design of functions and organization structures supporting meaningful survival Part II and to formulating principles for the design of organization structures enabling the rich sense of meaningful survival Part III Of course the relevance of cybernetics social systems theory and Aristotle s ethics can only be understood in full after they have been treated in more detail but based on what we said above it may already be possible to see why these theories have been chosen as conceptual background
