

Unoccupied Bed: A type of bed without a patient on it. It is made when there is no patient confined in bed or while a patient is in the shower or sitting up in a chair.

Types of Unoccupied Bed:

Open bed: The top covers (top sheet & blanket) are folded back so that the patient can easily get back into bed.

Closed bed: The top sheet, blankets, and bedspreads are drawn up to the head of the mattress and under the pillow; this is prepared in a hospital room before a new client is admitted to the room.
