## **Making Humans:**

*Governmental Automated Decision-Making and Human Rights* Stefan Schäferling, 2023-12-07 With the growing capabilities of artificial intelligence governments are integrating AI technologies into administrative and even judicial decision making aiding and in some cases even replacing human decision makers Predictive policing automated benefits administration and automated risk assessment in criminal sentencing are but a few prominent examples of a general trend While the turn towards governmental automated decision making promises to reduce the impact of human biases and produce efficiency gains reducing the human element in governmental decision making also entails significant risks This book analyses these risks through a comparative constitutional law and human rights lens examining US law German law and international human rights law It also highlights the structural challenges that automation poses for legal systems built on the assumption of exclusively human decision making Special attention is paid to the question whether existing law can adequately address the lack of transparency in governmental automated decision making its discriminatory processes and outcomes as well as its fundamental challenge to human agency Building on that analysis it proposes a path towards securing the values of human dignity and agency at the heart of democratic societies and the rule of law in an increasingly automated world This book will be of interest to researchers and scholars focusing on the evolving relationship of law and technology as well as human rights scholars Further it represents a valuable contribution to the debate on the regulation of artificial intelligence and the role human rights can play in that process

*On Human Nature* Jonathan H. Turner, 2020-11-24 In this book Jonathan H Turner combines sociology evolutionary biology cladistic analysis from biology and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present day great apes Selection pressures altered this inherited legacy for the ancestors of humans termed hominins for being bipedal and forced greater organization than extant great apes when the hominins moved into open country terrestrial habitats The effects of these selection pressures increased hominin ancestors emotional capacities through greater social and group orientation This shift in turn enabled further selection for a larger brain articulated speech and culture along the human line Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain speech and culture These complexes he shows can be understood as the cognitive complex the psychological complex the emotions complex the interaction complex and the community complex

*Engineering the Human* Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include

evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection

**Intelligent Bridge Maintenance and Management** Gang Wu,ZhiQiang Chen,Ji Dang,2024-08-17 This book provides a timely introduction to the methodology of Intelligent Bridge Maintenance and Management IBM M and a comprehensive synthesis of emerging digital technologies for realizing IBM M The authors who carry research teaching and consulting experience in the USA Japan and China present the background principles methods and application examples of essential IBM M solutions in eight dedicated chapters The digital technologies covered in this book include Artificial intelligence big data machine learning computer vision Data fusion 3D building information digital twin modeling virtual and augmented reality Internet of things sensors robotics including unmanned vehicles The book targets the audience in the broader Bridge Engineering community including academic researchers students bridge owners and technology providers

Innovative Intelligent Industrial Production and Logistics Michele Dassisti,Kurosh Madani,Hervé Panetto,2025-02-13 This two volume set CCIS 2372 2373 constitutes the proceedings of the 5th International Conference on Innovative Intelligent Industrial Production and Logistics IN4PL 2024 held in Porto Portugal during November 21 22 2024 The total of 15 full papers along with 38 short papers presented together in this book was carefully reviewed and selected from 76 submissions This conference focuses on research and development involving innovative methods software and hardware whereby intelligent systems are applied to industrial production and logistics This is currently related to the concept of industry 5 0 an expression the new wave that extends the trend towards automation and data exchange in manufacturing technologies and processes including cyber physical systems the industrial internet of things industrial robotics cloud computing cognitive computing and artificial intelligence towards the new role of human resources cooperating with these technologies

*The Routledge Handbook of the Ethics of Human Enhancement* Fabrice Jotterand,Marcello Ienca,2023-08-01 The Routledge Handbook of the Ethics of Human Enhancement provides readers with a philosophically rich and scientifically grounded analysis of human enhancement and its ethical implications A landmark in the academic literature the volume covers human

enhancement in genetic engineering neuroscience synthetic biology regenerative medicine bioengineering and many other fields The Handbook includes a diverse and multifaceted collection of 30 chapters all appearing here in print for the first time that reveal the fundamental ethical challenges related to human enhancement The chapters have been written by internationally recognized leaders in the field and are organized into seven parts Historical Background and Key Concepts Human Enhancement and Human Nature Physical Enhancement Cognitive Enhancement Mood Enhancement and Moral Enhancement Human Enhancement and Medicine Legal Social and Political Implications The depth and topical range of the Handbook makes it an essential resource for upper level undergraduates graduate students and postdoctoral fellows in a broad variety of disciplinary areas Furthermore it is an authoritative reference for basic scientists philosophers engineers physicians lawyers and other professionals who work on the topic of human enhancement

**Thinking Through the Problem of Hell** R. Zachary Manis, 2024-08-27 The Christian tradition teaches that some people will suffer eternally in hell But why Doesn't an all powerful God have the ability to prevent this from happening to anyone Wouldn't a perfectly good and loving God want to prevent it And doesn't the traditional teaching about hell function as a threat coercing those who truly believe it These questions convey the problem of hell the most disturbing of all theological problems and one of the most difficult to solve Thinking Through the Problem of Hell is a rigorous yet accessible treatment of the issue The solution that it develops called the divine presence model is that heaven and hell are the various ways that the righteous and the wicked experience the presence of God after the final judgment In its fully developed form the divine presence model addresses a whole host of theological issues the purpose of suffering the meaning of salvation the nature of free will and self deception and the reason that God remains partially hidden in this life even to those who earnestly seek Him This is a book for those who refuse pat simplistic answers to the hardest questions of the Christian faith

**Neural basis of social learning, social deciding, and other-regarding preferences** Steve W C Chang, Masaki Isoda, 2015-03-02 Humans and many other social animals decide or learn when necessary what to do in a given social situation by assessing a range of variables related to social states e g competitive or cooperative others overt behavior e g response choices and outcomes others covert mental states e g beliefs intentions and desires and one's own interpersonal inclination e g other regarding preferences and generosity Recent studies in social neuroscience have begun to uncover how such social variables are processed encoded and integrated in the brain The goal of the current Research Topic is to promote a better understanding of neural basis of social learning social decision making and other regarding preferences

**Education in the Making** Harold Davis Richardson, 1929 The Making and Unmaking of Technological Society Murray Jardine, 2004 Our inability to make ethical sense of technology is at the root of a crisis This book advocates a Christianity that fully understands technology its responsibilities and its possibilities

**Making Paper**, 1928 **Moral Issues in Military Decision Making** Anthony E. Hartle, 2004 Much has changed in warfare in recent years with America now dominant on the international scene and

terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published *Moral Issues in Military Decision Making* reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America s military leadership in the post 9 11 era Considering world affairs since the first edition the Gulf War Bosnia Afghanistan Iraq 9 11 and the emergence of the United States as an unrivaled military power Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism homeland defense asymmetric warfare the proliferation of American military interventions and the UN s role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America s citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission *The Congregationalist*

,1915 *Film Making* ,1976 ***The Human Factor in Industrial Preparedness*** Western Efficiency Society,1917
