Making It Legal:

Making Legal History Anthony Musson, Chantal Stebbings, 2012-01-26 The first book to address the way that the broad and inclusive subject of legal history is researched and written

Making Legal History Daniel J. Hulsebosch, R. B. Bernstein, 2013-09-20 One of the academy's leading legal historians William E. Nelson is the Edward Weinfeld Professor of Law at New York University School of Law. For more than four decades Nelson has produced some of the most original and creative work on American constitutional and legal history. His prize-winning books have blazed new trails for historians with their substantive arguments and the scope and depth of Nelson's exploration of primary sources. Nelson was the first legal scholar to use early American county court records as sources of legal and social history and his work on legal history in England, colonial America and New York has been a model for generations of legal historians. This book collects ten essays exemplifying and explaining the process of identifying and interpreting archival sources, the foundation of an array of methods of writing American legal history. The essays presented here span the full range of American history from the colonial era to the 1980s. Each historian has either identified a body of sources not previously explored or devised a new method of interrogating sources already known. The result is a kaleidoscopic examination of the historian's task and of the research methods and interpretative strategies that characterize the rich, complex field of American constitutional and legal history.

Legal Translation and the Dictionary Marta Chromá, 2004 This study concentrates on three major issues creating a basis for the making of the Czech-English Law Dictionary with Explanations: namely language including terminology in both the Czech and Anglo-American systems of law, the process of legal translation and the lexicographic method of producing a bilingual law dictionary. Terminology has been considered the most significant feature of language for legal purposes. It encompasses a wide range of special purpose vocabulary and higher syntactic units including legal jargon. Conceptual analysis is to be pursued whenever an identical term in the target language does not exist or its full equivalent is in doubt. Legal translation should be based primarily on comparative legal linguistic and genre analysis in order to make the transfer of legal information as precise, accurate and comprehensible as possible. The primary objective of legal translation is for the target recipient to be provided as explicit, extensive and precise legal information in the target language as is contained in the source text, complemented by the translator with facts rendering the original information fully comprehensible in the different legal environment and culture. A dictionary which will help its users to produce legal texts in the target language should be founded upon a profound comparative legal and linguistic analysis that will determine equivalents at the levels of vocabulary, syntax and genre. b select the appropriate lexicographic material to be included in the dictionary and c create
