## Panther Variants 194245:

**Panther Medium Tank 1942-45** Stephen A. Hart, 2012-06-20 The Panzerkampfwagen V Panther is one of the best known German tanks in existence and is considered one of the greatest tanks of World War II. When in June of 1941 Germany invaded Russia Panzertruppe encountered KV series and T 34 76 tanks far superior in firepower and armour protection to any Panzer in service at the time. It was therefore decided to design a new more powerful medium tank which could be quickly put into production. This book details the result the Medium Battle Tank available for service in January 1943. Later models ensured that it became one of the most feared tanks of WWII.

**Hitler's Tanks** Chris McNab, 2020-02-20 A fully illustrated and expertly researched guide to the tanks of Hitler's formidable war machine. The Panthers that rolled over Europe were Germany's most famous fighting force and are some of the most enduring symbols of World War II. However at the start of the war Germany's tanks were nothing extraordinary and it was operational encounters such as facing the Soviet T 34 during Operation Barbarossa which prompted their intensive development. Tactical innovation gave them an edge where technological development had not making Hitler's tanks a formidable enemy. Hitler's Tanks details the development and operational history of the light Panzer I and II developed in the 1930s the medium tanks that were the backbone of the Panzer Divisions the Tiger and the formidable King Tiger the heaviest tank to see combat in World War II. Drawing on Osprey's unique and extensive armour archive Chris McNab skilfully weaves together the story of the fearsome tanks that transformed armoured warfare and revolutionised land warfare forever.

**Hitler's Miracle Weapons: Secret nuclear weapons of the Third Reich and their carrier systems, the Luftwaffe and Kriegsmarine** Friedrich Georg, 2003

**Hitler's Miracle Weapons: The Luftwaffe and Kriegsmarine** Friedrich Georg, 2003 How close did Hitler come to his dream of developing nuclear weapons? What evidence is there for the design, testing and production of such weapons and their carrier systems? With this first volume in a series of at least three, Friedrich Georg has begun to answer these questions in great detail. The result is a groundbreaking new book on this topic. This first volume describes the efforts of the Luftwaffe and Kriegsmarine to design and produce carrier systems for the nuclear weapons the scientists of the Third Reich were developing. Following an introductory section in which the author outlines the Nazi atom bomb programme, Georg then investigates the enormous variety of craft the Luftwaffe began to either adapt or develop anew that would be used to carry such weapons of mass destruction. These included the search for an intercontinental Amerikabomber including the innovative Horten Ho XVIII Lighter designs such as the Arado Ar E 555, Messerschmitt P 1107 1108 and Junkers EF 132 140 are also described. The various atom bombs themselves are thoroughly investigated from the 1 ton to the massive 30 ton variety. Information about the variety of carrier systems being developed and in at least one case actually built by the Kriegsmarine is also provided. Finally the author investigates the reasons why Germany ultimately failed to produce the atom bomb. Appendices provide the most up to date research on a variety of topics including the small number of craft Japan was

developing to carry atom bombs and the Soviet capture of German nuclear research centres in the Baltic region at the end of the war Throughout the author is keen to only rely on the most reliable sources and lays many myths to rest in the process

The result is a truly compelling and groundbreaking work **Panther Variants 1942-45** Hilary Doyle, Tom

Jentz,1997-07-15 The Panther Medium Tank was produced as a direct result of early experiences with the revolutionary Soviet T 34 76 Designers and military experts combined to produce a number of variations to provide armoured support for the many branches of the German army Whether acting as a command communications vehicle involved in mobile air defence as a flakpanzer a Panzer division recovery vehicle or utilising the turret as a static defence system the Panther in its many forms was the mainstay of Germany s plan to keep her enemies at bay on two fronts This book the product of 25 years of research examines the numerous Panther variants in detail [M26/M46 Pershing Tank 1943-53](#) Steven J.

Zaloga,2000-11-25 From the moment that the M4 Sherman had been matched against German Panther and Tiger tanks the American tank crews had known that their vehicles were outclassed by the opposition What was needed was a more powerful tank more heavily armed and armored that could take on the powerful German panzers on a more equal footing Although it took time to develop by the latter months of the war numbers of M26 Pershing tanks were reaching the frontline US armored units Well armored and with a powerful 90mm gun the Pershing was a match for any tank in the German order of battle

**The Maginot Line 1928-45** William Allcorn,2003-08-20 The Maginot Line the massive series of fortifications built by France in the 1930s to defend its borders with Germany and Italy is perhaps the most maligned collection of fortifications ever built Despite being a technological marvel and the most sophisticated and complex set of fortifications built up to that time it failed to save France from crushing defeat in 1940 Yet there are those who argue that it accomplished exactly what it was designed to do This book provides a concise and informative treatment of the Maginot Line from North East France to the Mediterranean Packed with plans contemporary and modern images plus digital artwork it presents a detailed visual exploration of this famous fortification system **Hitlers Siegeswaffen** Friedrich Georg,2001 *The British National Bibliography* Arthur James Wells,1998 **Tiger** Egon Kleine,Volkmar Kühn,2004 [Hitlers letzter Trumpf](#) Friedrich
