Pandoras Keepers:

Pandora's Keepers Brian VanDeMark, 2003 During the war few of the atomic scientists questioned the wisdom of their desperate endeavor But afterward they were forced to deal with the sobering legacy of their creation Some were haunted by the dead of Hiroshima and Nagasaki and would become anti nuclear weapons activists others would go on to build bigger and even deadlier bombs Some would remain friends others would become bitter rivals and enemies In explaining their lives and their struggles Brian VanDeMark superbly illuminates the ways in which these brilliant and sensitive men came to terms with their horrific creation The result is spectacular history and a moral investigation of the highest order BOOK JACKET

Doing Honest Work in College, Third Edition Charles Lipson, 2019-01-25 Doing Honest Work in College stands on three principles do the work you say you do give others credit and present your research fairly These are straightforward concepts but the abundance of questionable online sources and temptation of a quick copy paste can cause confusion as to what s considered citing and what s considered cheating This guide starts out by clearly defining plagiarism and other forms of academic dishonesty and then gives students the tools they need to avoid those pitfalls This edition addresses the acceptable use of mobile devices on tests the proper approach to sources such as podcasts or social media posts and the limitations of citation management software Succeeding as an International Student in the United States and Canada Charles Lipson, 2010-02-15 Each year 700 000 students from around the world come to the United States and Canada to study For many the experience is as challenging as it is exciting Far from home they must adapt to a new culture new university system and in many cases a new language The process can be overwhelming but as Charles Lipson s Succeeding as an International Student in the United States and Canada assures us it doesn t have to be Succeeding is designed to help students navigate the myriad issues they will encounter from picking a program to landing a campus job Based on Lipson s work with international students as well as extensive interviews with faculty and advisers Succeeding includes practical suggestions for learning English participating in class and meeting with instructors In addition it explains the rules of academic honesty as they are understood in U S and Canadian universities Life beyond the classroom is also covered with handy sections on living on or off campus obtaining a driver s license setting up a bank account and more The comprehensive glossary addresses both academic terms and phrases heard while shopping or visiting a doctor There is even a chapter on the academic calendar and holidays in the United States and Canada Coming to a new country to study should be an exciting venture not a baffling

ordeal Now with this trustworthy resource international students have all the practical information they need to succeed in and out of the classroom

Pandora's Letter Box Doris Langley Moore, 1929

Pandora's Daughters Jane Robinson, 2002 This enthralling history full of anecdotes and first hand accounts centres on women through the ages who have sidestepped restraint and raised the eyebrows of their contemporaries by choosing to make their own often highly idiosyncratic way of life The pedigree of the modern career woman is not generally supposed to be long reaching back only as far as those late Victorian pioneers who stormed the bastions of male professions Jane Robinson looks back over some 25 centuries and proves that theory quite wrong The 100 or so women portrayed here were busy behind the scenes of recorded history in the cause of earning an honest or perhaps not independent living Their enterprise and flair led them to careers as diverse as they are improbable ranging from engineers plumbers and surgeons to a naval commander in the Persian Wars a Dark Age Pope a successful Orcadian wind seller some pirates a Royal Marine and a stockbroker who ran for President of the United States The author considers such achievements against their place and time and the result is a tribute to an inspirational body of women whose significance has too long been ignored as well as a wonderfully entertaining read

Pandora's Baby Robin Marantz Henig, 2006 On a September morning in 1973 a hospital administrator in New York City learned of a rogue experiment in progress at his institution and ordered the destruction of a test tube containing a frothy mixture of human eggs and sperm Had the experiment been allowed to continue it might have resulted in the first human fetus created through in vitro fertilization A ward winning journalist Robin Marantz Henig takes us back to the early days of IVF when the procedure was viewed as crackpot science and its pioneers as outsiders in the medical world Henig lays out the ethical and political battlefield of the 1970s a battlefield that is recreated with each new technology and traces the sea change that has occurred in the public perception of test tube babies That it was the first step down the slippery slope toward genetic engineering designer babies and human clones and a compelling story from the not so distant past which brilliantly presents the scientific and ethical dilemmas we confront ever
