Paradise Fields:

Perspectives on the Ancient Maya of Chetumal Bay Debra S. Walker, 2016-10-04 Brings novel synthetic insight to understanding a region that was a hub of waterborne trade and an important locus of production for some of the Maya's most valued crops. Cynthia Robin, author of *Everyday Life Matters: Maya Farmers at Chan*. This one-of-a-kind volume shows us how important this region was to the ancient Maya with detailed and vivid descriptions of sociopolitical and economic organization and their relation to the unique landscape and geography of Chetumal Bay. Laura J. Kosakowsky, author of *Preclassic Maya Pottery at Cuello, Belize*. Chetumal Bay is central to discussions of ancient Maya politics, warfare, economy, exchange and communication because of its unique location. Although the ancient Maya invested prodigious amounts of labor in the construction of road systems called *sacbeob* for communication and trade, recent archaeological discoveries around Chetumal Bay in both Belize and Mexico reveal an economic alternative to these roads: an extensive network of riverine and maritime waterways. Focusing on sites ringing the bay such as Cerro Maya, Oxtankah, and Santa Rita Corozal, the contributors to this volume explore how the bay and its feeder rivers affected all aspects of Maya culture from settlement, food production and the production and use of special goods to political relationships and social organization. Besides being a nexus for long-distance exchange in valuable materials such as jade and obsidian, the region was recognized for its high-quality agricultural produce including cacao, achiote, vanilla, local fruits, honey and salt, and for its rich marine environment. The Maya living on the fringes of the bay perceived the entire region as a single resource procurement zone. Waterborne trade brought the world to them, providing a wider horizon than would have been available to inland cities dependent only on Maya roads for news of the world. The research reveals that trade relations played a central role in the organization of human social life on Chetumal Bay.

Jade stone tools, honey and wax, ceramics, rum, land. What gave these commodities value in the Maya world and how were those values determined? What factors influenced the rise and fall of a commodity's value? *The Value of Things* examines the social and ritual value of commodities in Mesoamerica, providing a new and dynamic temporal view of the roles of trade of commodities and elite goods from the prehistoric Maya to the present. Editors Jennifer P. Mathews and Thomas H. Guderjan begin the volume with a review of the theoretical literature related to the value of things. Throughout the volume, well-known scholars offer chapters that examine the value of specific commodities in a broad time frame from prehistoric, colonial and historic times to the

Landscapes and Societies I. Peter Martini, Ward Chesworth, 2010-11-09 This book contains case histories intended to show how societies and landscapes interact The range of interest stretches from the small groups of the earliest Neolithic through Bronze and Iron Age civilizations to modern nation states The coexistence is of its very nature reciprocal resulting in changes in both society and landscape In some instances the adaptations may be judged successful in terms of human needs but failure is common and even the successful cases are ephemeral when judged in the light of history Comparisons and contrasts between the various cases can be made at various scales from global through inter regional to regional and smaller scales At the global scale all societies deal with major problems of climate change sea level rise and with ubiquitous problems such as soil erosion and landscape degradation Inter regional differences bring out significant detail with one region suffering from drought when another suffers from widespread flooding For example desertification in North Africa and the Near East contrasts with the temperate countries of southern Europe where the landscape effects of deforestation are more obvious And China and Japan offer an interesting comparison from the standpoint of geological hazards to society large unpredictable and massively erosive rivers in the former case volcanoes and accompanying earthquakes in the latter Within the North African region localized climatic changes led to abandonment of some desertified areas with successful adjustments in others with the ultimate evolution into the formative civilization of Egypt the Gift of the Nile At a smaller scale it is instructive to compare the city states of the Medieval and early Renaissance times that developed in the watershed of a single river the Arno in Tuscany and how Pisa Siena and Florence developed and reached their golden periods at different times depending on their location with regard to proximity to the sea to the main trunk of the river or in the adjacent hills Also noteworthy is the role of technology in opening up opportunities for a society Consider the Netherlands and how its

history has been formed by the technical problem of a populous society dealing with too much water as an inexorably rising sea threatens their landscape or the case of communities in Colorado trying to deal with too little water for farmers and domestic users by bringing their supply over a mountain chain These and others cases included in the book provide evidence of the successes near misses and outright failures that mark our ongoing relationship with landscape throughout the history of Homo sapiens The hope is that compilations such as this will lead to a better understanding of the issue and provide us with knowledge valuable in planning a sustainable modus vivendi between humanity and landscape for as long as possible Audience The book will interest geomorphologists geologists geographers archaeologists anthropologists ecologists environmentalists historians and others in the academic world Practically planners and managers interested in landscape environmental conditions will find interest in these pages and more generally the increasingly large body of opinion in the general public with concerns about Planet Earth will find much to inform their opinions Extra material The color plate section is available at <http://extras.springer.com> Guide to Lyme Regis, Charmouth and the Neighbourhood F.
