

# Work from Home: Cyber Security Tips

## LEARN ABOUT YOUR COMPANY'S WORK FROM HOME POLICIES

Before you start working from home, make sure that you're familiar with your company's guidelines for cybersecurity at home.

## INVEST IN A DEDICATED DEVICE FOR WORK

Get a separate laptop, tablet, or even a smartphone. This will help to keep your personal data separate from your work data, which will make it easier to protect both.

## SECURE YOUR WI-FI NETWORK

Use a strong password. Use WPA/WPA security. Enable MAC filtering. The last thing you want is for someone to be able to access your work data or devices.

## BEWARE OF PHISHING ATTACKS

To protect yourself from phishing attacks, you should never click on links or open attachments from unknown sources.

## LOCK AND ENABLE TRACKING ON YOUR WORK DEVICES

It's important to lock your work devices when you're not using them. This will help to prevent anyone from accessing your data if your device is lost or stolen.

## REGULARLY BACK UP IMPORTANT DATA

In the event that your work device is lost or stolen, or if it becomes infected with malware, you'll want to have a backup of your important data.

## USE AN AUTHENTICATOR APP

Authenticator apps generate one-time codes that you can use to log in, even if someone has your password.

## KEEP YOUR SOFTWARE AND OPERATING SYSTEM UP TO DATE

Vulnerabilities in software and operating systems made public, might let hackers exploit them to gain access to devices and data.

## We recommend: The top cybersecurity tip for work from home — use a VPN

A VPN encrypts your internet traffic and make it appear as if you're browsing from a different location. You can bypass censorship and access geo-blocked content, and protect your online identity.

**Digital Habits** David W. Schropfer,2016-07-18 Tired of all of the rules that you have to follow everyday just to be online The internet was easier once but now it seems like we spend half of our computer time worrying about hackers thieves viruses and other online traps It s time for a new approach It s time for intuitive reasonable habits to replace onerous mandatory rules It is time for simplicity to replace complexity and for confidence to replace fear These habits are behavioral not technical And they are easy so you can continue to do them on a regular basis Most importantly its time for an easy to understand explanation of the online traps that we are all trying to avoid It s like a bear trap in a strip mall the person who set the trap doesn t mind that they probably won t catch many bears because of the volume of people who will be ensnared just because they are passing by But if you know where to look the traps are easy to avoid Read this book to avoid common online traps with simple daily habits

[Tips for Local and Global Cybersecurity](#) Nick Selby,Heather Vescent,2018-12-15 Cybercrime can threaten any entity from small businesses to entire governments In this guide to cybersecurity readers will learn about cryptocurrencies how to spot digital deception and how to deal with cybermobs and trolls On a global scale cyberspying by international intelligence agencies can range from intellectual property theft to hacking into infrastructure and military while whistleblowers are sometimes hailed as defenders of free speech and sometimes vilified as traitors and threats to security All of these issues are addressed with case studies practical tips and infographics

**Cyber Smart** Bart R. McDonough,2018-12-06 An easy to read guide to protecting your digital life and your family online The rise of new technologies in our lives which has taken us from powerful mobile phones to fitness trackers and smart appliances in under a decade has also raised the need for everyone who uses these to protect themselves from cyber scams and hackers Every new device and online service you use that improves your life also opens new doors for attackers looking to discover your passwords banking accounts personal photos and anything else you want to keep secret In Cyber Smart author Bart McDonough uses his extensive cybersecurity experience speaking at conferences for the FBI major financial institutions and other clients to answer the most common question he hears How can I protect myself at home on a personal level away from the office McDonough knows cybersecurity and online privacy are daunting to the average person so Cyber Smart simplifies online good hygiene with five simple Brilliance in the Basics habits anyone can learn With those habits and his careful debunking of common cybersecurity myths you ll be able to protect yourself and your family from Identify theft Compromising your children Lost money Lost access to email and social media accounts Digital security is one of the most important and least understood aspects of our daily lives But it doesn t have to be Thanks to its clear instruction friendly tone and practical strategies Cyber Smart will help you rest more easily knowing you and your family are protected from digital attack
