Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 **IBM Midrange System Storage Implementation and Best Practices Guide** Sangam Racherla, Bruce Allworth, Alessio Bagnaressi, Chris Bogdanowicz, Corne Lottering, Pablo Pedrazas, Frank Schubert, John Sexton, Alexander Watson, IBM Redbooks, 2010-03-31 This IBM Redbooks publication represents a compilation of best practices for deploying and configuring IBM Midrange System Storage™ servers which include the DS4000 and the DS5000 family of products. This book is intended for IBM technical professionals, Business Partners and customers responsible for the planning, deployment and maintenance of the IBM Midrange System Storage family of products. We realize that setting up DS4000 and DS5000 Storage Servers can be a complex task. There is no single configuration that will be satisfactory for every application or situation. First we provide a conceptual framework for understanding the hardware in a Storage Area Network. Then we offer our guidelines, hints and tips for the physical installation, cabling and zoning using the Storage Manager setup tasks. After that we turn our attention to the performance and tuning of various components and features including numerous guidelines. We look at performance implications for various application products such as DB2, Oracle, Tivoli Storage Manager, Microsoft SQL server and in particular Microsoft Exchange with IBM Midrange System Storage servers. Then we review the various tools available to simulate workloads and to measure, collect and analyze performance data. We also consider the AIX environment including High Availability Cluster, Multiprocessing, HACMP™ and General Parallel File System, GPFSTM. Finally we provide a quick guide to the storage server installation and configuration using best practices. This edition of the book also includes guidelines for managing and using the DS4000 and DS5000 with the IBM System Storage SAN Volume Controller, SVC.
