Abernathy M.D., 2005-08-12 The practice of medicine or surgery is not just sore throats colds and the flu removing gall bladders or back aches and belly aches It is however a roller coaster cornucopia of people and events where drama comedy the heights of joy and the depths of sadness are only moments away as if a revolving door is constantly ejecting the next encounter a child with appendicitis a broken arm the Ku Klux Klan with death threats gunshot wounds snake handlers con artists sex racism rape a sweet old lady with arthritis or some addict a never ending myriad Thankfully most of my patients and I grew old together in an air of love and mutual respect in an era of closeness between patients and doctors when doctors really cared not only about the patient's health but also about the patients themselves Medical school forgot to mention ethics or talk about humanistic qualities abstract values outside the world of science The patient is not just a patient case that gallbladder in room 911 or a number but is a unique human being with emotions feelings worthiness fears hopes and worries as well as the capabilities of understanding and courage in the face of disaster He or she deserves full respect Ten Years of Rape Green Door of Racism Save A Sexist and Lose A Patient and The Comedy Corner are true stories about the people who traverse these pages a few of the curious encounters in my forty year love affair with helping people sometimes called the practice of medicine      Memoirs of a Medicine Man Ernest W. Abernathy M. D., 2005-08 Alzheimer's is an equal opportunity nondenominational disease having no respect of persons Until or unless there is a cure the best we can do is cope This book encourages a caregiver to be kind and compassionate while finding relief from stress through humor and basic faith It takes boldness to allow laughter to invade a sensitive situation without appearing unsympathetic to the victim Therefore notice is given early on that there is no attempt to be frivolous in this regard This true life narrative seen through the eyes of an African American author covers fifteen years of devotion to parents one the Alzheimer's disease and one with other long term disability Whether you are a caregiver or not you should find this book refreshing      *The Medicine Man* Emilius Clark Dudley, 1927      The Medicine Man: Being the Memoirs of Fifty Years of Medical Progress ... immigrant and a Jewish mother both suffering from chemical dependencies Kennedy grew up sickly in a tough Connecticut neighborhood His transition to Minnesota athlete leader and outdoorsman during high school and his acceptance at Harvard where he graduated with honors was nothing less than miraculous His success in medical school and subsequent work as an instructor scientist medical researcher and medical oncologist was the fulfillment of the American Dream Dr Kennedy says Cancer currently strikes one in two men and one and three women It s treated by men in white coats which most people know only as fairly anonymous health providers Over my career I ve come to realize people need to understand that their doctors are people who have known strife hardship challenges That we have different skill sets and varying approaches Patients and families need to know this In particular cancer patients need to realize there s a human behind the white coat who should be their partner in treatment Through this book readers will see inside the system that trains doctors They will meet doctors understand how doctors themselves perceive their patients and be more able to decide how and by whom they want to be treated Nothing is more powerful for cancer patients than finding the right partner to provide them treatment care and comfort Dr Kennedy describes how incorporating alternative medicine into his practice helped him treat patients more effectively and details how accommodating cultural norms within specific Los Angeles ethnic communities helped him identify and gain early diagnosis for hundreds of cancer patients who might otherwise have gone untreated He reviews how and why cancer must be treated as a family illness and why families and support structures are critical to extending life and providing optimal quality of life to patients afflicted with cancer Dr Cary Presant Clinical Professor of Medicine at the University of Southern California Keck School of Medicine says Reading this excellent book shows how difficult it is to become a physician and fight disease as well as the medical system Dr Kennedy s descriptions of his feelings about his patients are richly worded and emphasize how important it is for each reader to find a dedicated compassionate doctor like the author I recommend it highly Dr Presant is also past President of the California Division of the American Cancer Society and Past President and Chairman of the Board of the Medical Oncology Association of Southern California Medicine Man takes readers on a journey through the American medical system and gives them information and insight that may well save their life or the life of someone they love It is the perfect read for anyone currently undergoing cancer treatment or for anyone who is considering a career in medicine
