**Quantificational Modification** Zaina Hafiz Tsouhlaris, 2011 The thesis explores the syntactic and semantic dimensions of four linguistic elements that appear in Modern Greek, arguably as quantifiers and modifiers, i.e. in the form of Quantificational Modifiers (QMods): *olos* (all), *holos* (whole), *overall* and its extension *olikos* (total), *merikos* (some), a few, *partial*, *ligos* (some), a few, *little*, *insignificant* and *polis* (many), *great*, *considerable*. Such QMods are analyzed as measure quantifiers of scalar semantics that appear in a syntactic position common to adjectival modifiers. The thesis explores specific sets of readings and their interpretations. Such a phenomenon is common to Modern Greek, English, French and Arabic QMods and gives evidence to the universality of Quantificational Modification. Chapter 1 discusses Quantification as semantic interpretation along with the main questions this research intends to answer while Chapter 2 reviews recent literature on Quantification within and across languages. Chapter 3 focuses on Modern Greek expressions of Quantification and extends Chapter 2 into a further discussion about the various syntactic manifestations. Chapters 4 and 5 are extensions to Chapters 2 and 3 as they discuss the semantics of specific QMods as total and partial quantifiers which operate on homomorphic sets of degrees and amounts. Chapter 6 discusses the broader issues in the thesis from a theoretical and typological perspective that establishes Quantificational Modification as a universal and purely semantic subclass of Quantification. Our findings are summarized in Chapter 7 followed by suggestions for expanding our investigation into other related areas.

**Reimagining Student Engagement** Amy Berry, 2022-09-27 Engage students as true partners in learning. Instead of disruptions, avoidance and withdrawal, your learners could be participating, investing and driving their learning experience. It's time to reimagine student engagement. Focused around three essential goals, *Reimagining Student Engagement* develops a new vocabulary for real classrooms, proposes an engagement model positioning students as active partners in the learning process and embeds the concept of engagement into the teaching and learning process. Inside you'll find Reflection prompts that connect ideas to experiences, Vignettes illustrating common conceptions of engagement as well as challenges, Case studies showcasing real teachers using engagement strategies with learners, Practical classroom strategies and tips for application. When you reimagine student engagement, you'll see your students as true agents of their own learning and provide them with the motivational resources that fuel collaboration and school success.

Wassermann,2021-01-15 The complexity of what teachers do is incomprehensible to anyone who has not lived the experience If one examines in detail the multi dimensional multi layered multi faceted acts that a teacher performs each teaching day it almost defies belief for it is beyond heroic Done well the impact is to influence students for all the days of their lives Done well it leaves students altered for the better It takes a trained observer to perceive and comprehend the various acts both overt and subtle that a teacher carries out during the course of a school day This is the onus of this book to make explicit the professional tasks of a teacher in today s fast changing world where technology is rapidly replacing human interactions where disinformation is daily fed to a gullible public where funding and professional resources for schools are never enough where students come to school carrying physical and emotional burdens that would daunt most adults where the tasks of teachers are more demanding and more heartbreaking than ever before How a teacher gives his or her all and yet manages to keep at the job without burning out is a significant feature of this book Not only are these professional tasks identified and explained but suggestions are offered for how new and practicing teachers may further hone those skills that each task demands Knowing the tasks is not enough learning to apply them successfully is the key to becoming that master teacher
