**Marxism, Mysticism and Modern Theory** Suke Wolton,2016-07-27 Fashionable new theories tend to reject universal reason in favour of pluralism and locality Marxism Mysticism and Modern Theory examines some of these theories and argues that they are the mystified expression of the current political and economic impasse Today s relativistic outlook reveals a minimalist and atomized viewpoint a retreat from the goal of rational understanding Marxism Mysticism and Modern Theory sets out in this critique the case for developing a new humanism to extend rationality      Urban Sociology and Urbanized Society J.R. Mellor,2013-04-15 Focusing on urban sociology as practised in Britain the author argues that it is a key element in the response of the intellectual proletariat to urbanization and the calls on it by the State to control the ensuing way of life The themes of urban sociology have been the concerns of the Welfare State and despite radical inputs the discipline has remained tied up with the assumptions and methodological precepts of liberalism The author s contention is that urbanization should be analysed in the framework of the political economy of regional development This book was first published in 1977      Speaking of Diversity Philip Gleason,2019-12-01 Originally published in 1992 In this collection of essays Philip Gleason explores the different linguistic tools that American scholars have used to write about ethnicity in the United States and analyzes how various vocabularies have played out in the political sphere In doing this he reveals tensions between terms used by academic groups and those preferred by the people whom the academics discuss Gleason unpacks words and phrases such as melting pot and plurality used to visualize the multitude of ethnicities in the United States And he examines debates over concepts such as assimilation national character oppressed group and people of color Gleason advocates for greater clarity of these concepts when discussed in America s national political arena Gleason s essays are grouped into three parts Part 1 focuses on linguistic analyses of specific terms Part 2 examines the effect of World War II on national identity and American thought about diversity and intergroup relations Part 3 discusses discourse on the diversity of religions This collection of eleven essays sharpens our historical understanding of the evolution of language used to define diversity in twentieth century America      **The City** Alan S. **Urbanism As a Way of Life** Louis Wirth, 1991-10-01

**New York in Cinematic Imagination** Vojislava Filipcevic Cordes, 2020-06-11

New York in Cinematic Imagination is an interdisciplinary study into urbanism and cinematic representations of the American metropolis in the twentieth century It contextualizes spatial transformations and discourse about New York during the Great Depression and the Second World War examining both imaginary narratives and documentary images of the city in film The book argues that alternating endorsements and critiques of the 1920s machine age city are replaced in films of the 1930s and 1940s by a new critical theory of agitated urban modernity articulated against the backdrop of turbulent economic and social settings and the initial practices of urban renewal in the post war period Written for postgraduates and researchers in the fields of film history and urban studies with 40 black and white illustrations to work alongside the text this book is an engaging study into cinematic representations of New York City

**Weber and Toennies** Joseph B. Maier, 2017-09-08

This collection of selected essays by Werner J Cahnman brings together out of scattered dispersion his writings about Max Weber Ferdinand Toennies and historical sociology. The great theoretical range and depth of his intellect and mastery of sociological thinking is apparent as he discusses the impact of romanticism on modern thought and how Weber and Toennies both analyzed and reacted to modernity. Cahnman places Weber 1864-1920 the dominant figure in twentieth century sociology in the midst of the methodological controversies so characteristic of contemporary social science and he fully discusses the overarching importance of Weberian ideal type theory. Although less well known than Weber Toennies 1855-1936 was also a sociologist of the first rank. He is best remembered for his enormously influential twin concepts *Gemeinschaft* and *Gesellschaft* which contributed to our understanding of the historical and sociological basis for the change from premodern to modern societies. The essays in this volume establish Toennies intellectual connections to Karl Marx Max Weber Emile Durkheim and Herbert Spencer and clarify his influence upon American sociology. Cahnman stood against strict separations between history and sociology and his essays are all informed by a wonderful admixture of the theoretical and the concrete. They demonstrate how a genuine historical sociology not unlike that of Weber and Toennies can find and explain linkages between seemingly disparate events spanning time and place. This volume will be of interest to sociologists political scientists and intellectual historians.
