Moveable Margins:

Monograph on the Sub-class Cirripedia Charles Darwin, 2016-08-19 My duty in acknowledging the great obligations under which I lie to many naturalists affords me most sincere pleasure I had originally intended to have described only a single abnormal Cirripede from the shores of South America and was led for the sake of comparison to examine the internal parts of as many genera as I could procure Under these circumstances Mr J E Gray in the most disinterested manner suggested to me making a Monograph on the entire class although he himself had already collected materials for this same object Furthermore Mr Gray most kindly gave me his strong support when I applied to the Trustees of the British Museum for the use of the public collection and I here most respectfully beg to offer my grateful acknowledgments to the Trustees for their most liberal and unfettered permission of examining and when necessary disarticulating the specimens in the magnificent collection of Cirripedes commenced by Dr Leach and steadily added to during many years by Mr Gray Considering the difficulty in determining the species in this class had it not been for this most liberal permission by the Trustees the public collection would have been of no use to me or to any other naturalist in systematically classifying the Cirripedes Charles Darwin **Marine Decapod Crustacea of Southern Australia** Gary C.
