**Invasion Biology and Ecological Theory** Herbert H. T. Prins,Iain J. Gordon,2014-01-23 Many conservationists argue that invasive species form one of the most important threats to ecosystems the world over often spreading quickly through their new environments and jeopardising the conservation of native species As such it is important that reliable predictions can be made regarding the effects of new species on particular habitats This book provides a critical appraisal of ecosystem theory using case studies of biological invasions in Australasia Each chapter is built around a set of eleven central hypotheses from community ecology which were mainly developed in North American or European contexts The authors examine the hypotheses in the light of evidence from their particular species testing their power in explaining the success or failure of invasion and accepting or rejecting each hypothesis as appropriate The conclusions have far reaching consequences for the utility of community ecology suggesting a rejection of its predictive powers and a positive reappraisal of natural history

**Bluebird Seasons** Mary Taylor Young,2023-05-02 This wonderful book is faithful both in its witness to the world s beauty and to our need to act now to preserve something of that wonder and grace It brings the bracing air of the Rockies to us all Bill McKibben author of The End of Nature In this A Sand County Almanac for the twenty first century nature writer and zoologist Mary Taylor Young tells the story of the growing effects of climate change on her land in the pine covered foothills of southern Colorado Climate change wasn t yet on the public radar when Young and her husband bought their piece of the wild in 1995 They built a cabin set up a trail of bluebird nest boxes and began a nature journal of observations delighting in the ceaseless dramas joys and tragedies that are the fabric of life in the wild But

changes greater than the seasonal cycles of nature became evident over time increasing drought wildfires bears delaying hibernation and the decline of familiar birds and appearance of new species Their journal of sightings over twenty five bluebird seasons she realized was a record of climate change happening not in an Indonesian rainforest or on an Antarctic ice sheet but in their own natural neighborhood Using the journal as a chronicle of change Young tells a story echoed in everyone s lives and backyards But it s not time to despair she writes It s time to act Young sees hope in the human ability to overcome great obstacles in the energy and determination of young people and in nature s resilience which the bluebirds show season after season
