[Visual Reasoning in Science, Engineering, and the Humanities](#) Daria Bylieva, Dong Luo, Alfred Nordmann, 2026-01-14

This book investigates visualization practices conceptually, historically, and strategically, showing what visual thinking can achieve especially in professional training and educational contexts. For a long time, science and education were dominated by the word. What mattered were written texts, mathematical formulae, and verbalizations. And yet, similes, metaphors, illustrations, diagrams, and geometric demonstrations were always involved. Engineering and design thinking established the virtues of visual thinking. A blue print or schematic representation can be investigated for dependencies and cause-effect relations. In recent decades, a better understanding of visual thinking opened the door for tools and techniques especially in educational contexts.
