For Beginners Sports Training:

Fundamentals Of: Sports Training L. Matveyev, Sports training is a scientific and systematic process aimed at improving an athlete's performance by developing physical, technical, tactical, and psychological abilities. It follows key principles such as individuality, specificity, overload, progression, and recovery to ensure balanced development. Proper training involves planned exercises, gradual increase in intensity, adequate rest, and psychological preparation to enhance endurance, strength, speed, flexibility, and coordination. Sports training is a planned and systematic method to improve athletic performance. Training programs should suit each athlete's age, fitness level, and goals. Exercises should match the demands of the particular sport or event. Performance improves when the body is challenged beyond its normal capacity. Training intensity and volume must increase gradually for continuous improvement. Adequate rest is essential for muscle repair and performance enhancement. Performance declines when training stops; regular practice is necessary. Changing training routines prevents boredom and overtraining. Training is divided into phases to achieve peak performance at the
