**Insight Guide China** Tom Le Bas, 2007. **Southeast Asia: A Ten Nation Region** Ashok K. Dutt, 2012-12-06. This book

introduces the ten nation region of Southeast Asia. The main themes of the book are diversity, differential development and changing socio-economic and political setting affecting these characteristics in the 1990s. The nations of Southeast Asia have different languages, three dominant religions (Buddhism, Islam and Christianity), varied levels of economic development that range from bare agricultural subsistence to highly urbanized and highly developed. The historically based core areas of these countries have evolved on their own. Moreover, the effects of Indian, Chinese, Islamic and Western cultures have been experienced differently in different nations at different times in their histories. This book is intended to be understood by all those who want an initial introduction to Southeast Asia. As many aspects of the book are the result of an in-depth research carried out by the contributing authors, it is also a valuable reference. The contributing authors have portrayed the basic spatial aspects of the region as well as their relevance in the 1990s, based in novel ways and through original interpretations. All first and some second authors of chapters are professors. All but one have Ph.D.s. Most contributing authors are geographers but with different sub-specialties.

Insight Guides, 1995-11 *Provence Insight Pocket Guide* Insight Guides, 1995-05 *Serving Library Users*

from Asia

John Hickok, 2019-06-12

Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g. disabled, Latino seniors, etc.), few books on serving library users of Asian heritage have been written. Thus, the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries/cultures (of East, Southeast, and South Asia) with a wealth of resources for understanding, interacting with, outreach to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps, sample library vocabulary, Asian booksellers nationwide, cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries (public, school, and academic) making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment, is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described. Literacy levels, reading cultures, languages, and writing systems, educational systems, and more are based on the author's 15 years of research and travels to Asia. This work is a must have for all librarians.
