multivariate analysis progression during the first 11 to 24 months was higher in the 7 to 9 and 10 to 12 age groups 0.43 D and 0.42 D respectively for higher spherical equivalent at baseline at least 0.33 D for SE 1 D and for girls 0.35 D

CONCLUSION This is the first French epidemiological study to investigate myopia progression in a large cohort of children. Sex, age groups and myopia severity are associated with differing rates of progression.

Encyclopedia of the Eye Joseph Besharse, Reza Dana, Barbara Ann Battelle, Thomas A. Reh, Ernst R. Tamm, David Beebe, Peter Bex, Paul Bishop, Dean Bok, Patricia D'Amore, Henry Edelhauser, Linda Mcloon, Jerry Niederkorn, 2010-05-27 As the first comprehensive reference for the eye, its support structures, diseases and treatments, *Encyclopedia of the Eye* is an important resource for all visual scientists, ophthalmologists and optometrists as well as researchers in immunology, infectious disease, cell biology, neurobiology and related disciplines. This four-volume reference is unique in its coverage of information on all tissues important for vision, including the retina, cornea and lens. It also covers the physiological and pathophysiological processes that affect all eye tissues. This *Encyclopedia* is invaluable for graduate students and postdoctoral fellows who are seeking an introduction to an area of eye research. Each chapter explains the basic concepts and provides references to relevant chapters within the *Encyclopedia* and more detailed articles across the wider research literature. The *Encyclopedia* is also particularly useful for visual scientists and practitioners who are researching a new area, seeking deeper understanding of important research articles in fields adjacent to their own or reviewing a grant outside their immediate area of expertise. Written by experts at a level that permits students to grasp key elements of a specific subject, it provides an entryway into the major features of current eye research. No other source puts this much information so well indexed and with so many helpful full-color figures and graphics in the hands of the ophthalmic scientist.

Ocular Periphery and Disorders Darlene A. Dartt, Peter Bex, Patricia D'Amore, Reza Dana, Linda Mcloon, Jerry Niederkorn, 2011-03-31 This selection of articles from the *Encyclopedia of the Eye* is the first single-volume overview presenting articles on the function, biology, physiology and pathology of the structures of the ocular periphery as well as the related disorders and their treatment. The peripheral structures are implicated in a number of important diseases, including optic neuritis, thyroid eye disease and strabismus. The volume offers a basic science background of these topics rather than a strictly clinical focus. The first single-volume to integrate comparative studies into a comprehensive resource on the neuroscience of the ocular periphery, chapters are carefully selected from the *Encyclopedia of the Eye* by the world's leading vision researchers. The best researchers in the field provide their conclusions in the context of the latest experimental results.

Decision Making in Ophthalmology W. A. J. Van Heuven, Johan Zwaan, 2000 *Decision Making in Ophthalmology* teaches the resident or relatively inexperienced practitioner to approach clinical problems in a logical, step-by-step manner through the use of algorithms or decision trees. The focus of each chapter is its algorithm, which outlines the decision-making process the physician should follow in diagnosing and treating a specific condition. For residents, it is an excellent resource for board examination review. For the

practitioner it enhances clinical efficiency with comprehensive coverage of ophthalmology in a concise easy format especially important for physicians practicing in a managed environment Contains 140 easy to use decision trees covering every major area of ophthalmology detailed enough to include differential diagnosis Key decision points are highlighted referring you to text on the facing page that offers explanation adds detail or discusses the rationale for particular decisions Completely revised to bring you up to date with the newest management strategies Includes 10 new chapters on neuro ophthalmic disorders Ideal for board review Contains completely revised information providing the latest ophthalmic and management strategies Includes 10 new chapters on neuro ophthalmic disorders
