Myth Of Inevitable Progress:

The Myth of Inevitable Progress Franco Ferrarotti, 1985 Franco Ferrarotti examines the ways in which we have come to cope with the problems unforeseen by the early idealists of the industrial age Beginning with a detailed critique of the Enlightenment concept of the individual and how it compares to present day values beliefs and attitudes he proceeds to demonstrate how current technology influences the lives of individuals in the work place and in the community at large The influence of science and industrial progress on our development as human beings is critically analyzed Finally Ferrarotti gives some suggestions as to how we may find a way out of the dilemmas facing modern society and speculates on the fates of those societies currently in transition While many writers have dealt with specific aspects of the modern industrial age Ferrarotti faces squarely the general problem of the social and political impact of technologically based life
