The Mythic Image Joseph Campbell, Marie-Jeanne Abadie, 1981-11-21 This book presents approximately 450 illustrations of mythic art from Mesopotamian Egyptian Indian Chinese European and Olmec cultures as a basis for an exploration into the relation of dreams to myth

The Poem in the Story Harold Scheub, 2002-12-05 Fact and fiction meet at the boundaries the betwixt and between where transformations occur This is the area of ambiguity where fiction and fact become endowed with meaning and this is the area where ambiguity irony and metaphor join forces that Harold Scheub exposes in all its nuanced and evocative complexity in *The Poem in the Story* In a career devoted to exploring the art of the African storyteller Scheub has conducted some of the most interesting and provocative investigations into nonverbal aspects of storytelling the complex relationship between artist and audience and most dramatically the role played by poetry in storytelling This book is his most daring effort yet an unconventional work that searches out what makes a story artistically engaging and emotionally evocative the metaphorical center that Scheub calls the poem in the story Drawing on extensive fieldwork in southern Africa and decades of experience as a researcher and teacher Scheub develops an original approach a blend of field notes diary entries photographs and texts of stories and poems that guides readers into a new way of viewing even experiencing meaning in a story Though this work is largely focused on African storytelling its universal applications emerge when Scheub brings the work of storytellers as different as Shakespeare and Faulkner into the discussion

The Mythic Image Joseph Campbell, M. J. Abadie, 1982

To Remember the Faces of the Dead Thomas Maschio, 1994 As he challenges classical semiological accounts of cultural representation in this ethnography of Melanesian religious phenomenology Thomas Maschio shows that ritual and poetic performance are about the enactment expression and invention of the self Maschio demonstrates how such emotions as nostalgia anger sadness and grief are creatively transformed during the course of religious performance and expression into a form of cultural memory one that juxtaposes a pattern of cultural meaning with the emotional feeling of plenitude the Melanesian Rauto call makai Evoked during initiation mourning and agricultural rites and figuring prominently in Rauto discourse about the self makai joins personal memory to patterned sets of images and meanings that Westerners would call culture

A Rhetoric of Motives Kenneth Burke, 1969-10 The system is a coherent and total vision a self contained and internally consistent way of viewing man the various scenes in which he lives and the drama of human relations enacted upon those scenes W H Rueckert Kenneth Burke and the Drama of Human Relations

Why They Believe Amy Cook, Ph.D., 2013-05-28 Why do they do it is a question often asked about people who choose to live a polygamous lifestyle This book aims to answer that very question Driven by the theories of Kenneth Burke Janja Lalich George Cheney Max Weber and others this six year study explores organizational identification and unobtrusive control and compliance as it intersects with rhetoric organizations and religion To explore the overarching question of why people choose to live this lifestyle 14 current and 14 former polygamists volunteered to participate in in depth interviews

Current members affirm their freedom of choice and say they would never live any other way Former members state they were victims of brainwashing and organizational control Both sides are represented equally and both perspectives are given full treatment In addition to in depth interviews written organizational documents were collected and analyzed using Extended Metaphor Analysis Aristotelian Analysis and Burkean Identification Strategies Why They Believe investigates the question of why they do it in a depth never before explored This book is a must read for anyone interested in the reasons polygamists choose to live this alternative lifestyle *Retire Your Family Karma* Ashok Bedi, Boris Matthews, 2003-11-01 We reap what we sow but we also reap what others before us have sown If we do this unconsciously we find ourselves victims of unfortunate circumstances but if we are conscious of what we have taken on from our family legacy we can turn it around Doctors Bedi and Matthews have worked with people who have carried the burden of their families best achievements worst failures and unrealized dreams With their experience we learn to recognize our karmic inheritance and settle our family s karmic accounts so we can redirect our energies in accord with our own true path and passion our soul s calling Bedi and Matthews explain how ancestral karma gets energetically encoded in the chakras of our subtle body and manifests as chakra blockages or overactivity They provide case histories from their patients an analysis of the Kennedy family history as well as the archetypal example of the history of the House of Atreus the Greek legacy of family betrayal stemming from Tantalus to Atreus and Thyestes to Agamemnon and finally Orestes In addition to these examples and illuminating case studies the authors teach us how to use dreamwork journaling and diagramming our family tree as tools for identifying and overcoming inherited karma To totally comprehend our roots and to realize our destiny we must look beyond our individual life and understand our ancestral context in order to make sense of our journey Once we have identified the blessings and the curses we have inherited we have the possibility of choice The best way to break old patterns is to work on establishing new ones

Realism and Psychological Science David J. F. Maree, 2020-06-02 The book provides an argument why realism is a viable metatheoretical framework for psychological science By looking at some variations of realism such as scientific realism critical realism situational realism and Ferraris new realism a realist view of science is outlined that can feature as a metatheory for psychological science Realism is a necessary correction for the mythical image of science responsible for and maintained by a number of dichotomies and polarities in psychology Thus the quantitative qualitative dichotomy scientist practitioner polarity and positivist constructionist opposition feed off and maintains a mythic image of science on levels of practice methods and metatheory Realism makes a clear distinction between ontology and epistemic access to reality the latter which easily fits with softer versions of constructionism and the former which grounds science in resistance and possibility loosely translated as criticism By taking science as a critical activity an issue such as the quantitative imperative looses its defining force as a hallmark of science it provides epistemic access to certain parts of reality In addition essentially critical activities characteristic of various qualitative approaches may be welcomed as proper science Academics

professionals and researchers in psychology would find value in situating their scholarly work in a realist metatheory avoiding the pitfalls of traditional methodologies and theories

Museum Rhetoric M. Elizabeth Weiser, 2017-09-25 In today's diverse societies museums are the primary institutions within the public sphere in which individuals can both engage critical thought and celebrate community This volume uses the lens of rhetoric to explore the role these societal repositories play in establishing and altering cultural heritage and national identity Based on fieldwork conducted in over sixty museums in twenty two countries across six continents Museum Rhetoric explores how heritage museum exhibits persuade visitors to unite their own sense of identity with that of the broader civic society and how the latter changes in response Elizabeth Weiser examines what compels communities organizations and nations to create museum spaces and how museums operate as sites of both civic engagement and rhetorical persuasion Moving beyond rhetorical explorations of museums as memory sites she shows how they intentionally straddle the divides between style and content intellect and affect and unity and diversity and why their portrayal of the past matters to civic life and particularly studies of nationalism in the present and future Deeply researched and artfully argued Museum Rhetoric sheds light on the public impact of cultural and aesthetic heritage and opens avenues of inquiry for scholars of museum studies and public history
