**The Mythology of Modern Dating Methods** John Woodmorappe, 1999      *Evolution Vs. Creationism* Eugenie Carol Scott, 2005 Almost eighty years after the Scopes trial the debate over the teaching of evolution continues to rage There is no easy resolution it is a complex topic with profound scientific religious educational and legal implications How can a student or parent understand this issue which is such a vital part of education Evolution vs Creationism provides a badly needed comprehensive and balanced survey Written by one of the leading advocates for the teaching of evolution in the United states this accessible resource provides an introduction to the many facets of the current debate the scientific evidence for evolution the legal and educational basis for its teaching and the various religious points of view as well as a concise history of the evolution creationism controversy Each of the four sections of Evolution vs Creationism provides a resource that will assist the reader in better understanding these issues The first section addresses the nature of how evolution works as part of the scientific enterprise as well as a summary of the relationship between religious beliefs and science A section on the history of the controversy provides a handy synopsis of the lengthy struggles from before Darwin to the present day between advocates of creationism and the proponents of evolution A collection of primary source documents addressing cosmology law education and religious issues from all sides of the debate constitute the third section The book concludes with a selection of resources for further information for those who wish to study the topic in more depth      *Rock Solid Answers* Michael J. Oard, John K. Reed, Aaron Hutchinson, 2009 NOW A POWERFUL CORE OF AUTHORS PROVIDES CLEAR COMPELLING AND COMPREHENSIVE EVIDENCE AND ANSWERS FOR SOME OF THE MOST COMMON POINTS OF CONTENTION ON THIS ARGUMENT      The Evolution Controversy Thomas B. Fowler, Daniel Kuebler, 2007-08-01 In the emotional debate surrounding evolution it is often difficult to cut through the competing agendas to gain an unbiased understanding of the scientific issues involved The Evolution Controversy provides a resource for doing so The authors leave aside the profound philosophical and religious issues involved in the controversy in favor of a balanced and critical examination of the four major schools of thought involved Neo Darwinism Creationism Intelligent Design and Meta Darwinism The focus is on an objective evaluation of the scientific merits of each school as well as an examination of areas of agreement and disagreement among the schools The goal is to equip readers whether students church leaders or the general public to come to their own informed conclusions      Persuaded by the Evidence Dr. Jerry Bergman, Doug Sharp, 2008-08-01 True Stories of Faith Science the Power of a Creator A unique and interesting collection of true stories from Christians each sharing his personal journey to find the biblical truth of a six day creation From scientists in the midst of complex research to youth ministers and more see how each began at a different point and place in his life to question the supposed truth of evolution and how faith and actual evidence led to his embracing a creation based biblical world view In their testimonies you will read about their search for answers often unavailable through their school their church or scientific knowledge and

how the discoveries they made have shaped their faith and changed their lives Seeking answers for yourself Discover the powerful truths these individuals now share and find yourself also persuaded by the evidence Contributors include Carl Kerby Curt Sewell Dr Walter T Brown Dr Raymond Damadian Frank Sherwin and more Stories Focus on Powerful testimonies of the concept of a creator Discovering creation truths within scientific careers Understanding the relevance of Genesis to your personal faith Finding answers to life s toughest questions through understanding Genesis Appreciating the powerful influence of creation believers and scholars Features a Founding Fathers of Creationism special section focused on Dr Henry Morris Dr John Whitcomb Dr Andrew Snelling and more Special spotlight Short biography of Dr Mortimer Adler chairman of the board of editors of Encyclopedia Britannica for many years **Perspectives on the Age of the Earth and Why They Matter** Francis Ö. Dudás,2020-02-13 Polls show almost half of US adults believe that Earth is only 10 000 years old whereas scientists consider our planet to be 4 56 billion years old Examining these conflicting views illuminates aspects of the perceived conflict between religion and science and helps us understand the battles between evolutionist and creationist advocates This book examines how we approach knowledge and how we look at certainty It disentangles the threads of the traditional knowledge we are taught from the knowledge we gain from our own investigation of truth It argues that nature the basis of science and scripture the basis of religion derive from a single source Because of their shared origins religious and scientific perspectives grounded in verifiable truths must be in harmony The book presents the science behind the reliability of isotopic dates and critiques young earth creationist attacks on isotopic studies Though the nature of time is a philosophical issue its measurement is a scientific venture that has affirmed that Earth is 4 56 billion years old The harmony of science and religion based on recognition of their single source is a prerequisite for the progress of humanity as a whole
