

The background of the book cover is a classic Impressionist painting. It depicts two figures, a man and a woman, sitting on a garden bench. The man is on the left, wearing a dark jacket and a hat, and is holding a large yellow parasol. The woman is on the right, wearing a light-colored dress and a dark hat. They are in a garden with green grass and trees in the background. The painting has a visible brushstroke texture and a palette of greens, blues, and yellows.

## **Nabis Bonnard Vuillard And Their Circle:**

*The Nabis* Claire Frèches-Thory, Antoine Terrasse, 1991 Inspired by contemporary Symbolist theory and the art of Paul Gauguin the Nabis set out to revolutionize traditional aesthetics turning their talents to painting printmaking posters book illustration textiles furniture and theatre design Their common aim was to make art part of everyday life

**Nature's Experiments and the Search for Symbolist Form** Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis, Odilon Redon, Vuillard, August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature's experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists' solutions to the problem of symbolist form and provided a ready made methodology for fin de siècle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation, automatism, the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism *Nature's Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism

**Artistic Brotherhoods in the Nineteenth Century** Laura Morowitz, William Vaughan, 2017-11-01 This title was first published in 2000 The nineteenth century saw the emergence of numerous artistic brotherhoods groups of artists bound together in communal production sharing spiritual and aesthetic aims Although it is widely acknowledged that this is a unique feature of the period there has not previously been a separate study of the phenomenon This collection of essays provides a thorough and wide ranging exploration of the issue Situating artistic brotherhoods within their historical context it offers unique insights into the social, political, economic and cultural milieu of the nineteenth century It focuses on the most celebrated and influential brotherhoods while also bringing to light lesser known or forgotten artists The essays explore the artistic fraternity from a wide variety of perspectives probing issues of gender identity, professional practices and artistic formation in Europe and the United States This book investigates the Nazarenes, the Pre Raphaelites, the Russian Abramstovs, the Primitifs, the Nabis as well as other leading groups The book contains a substantial introduction which establishes the key questions and issues surrounding the phenomena of the artistic brotherhood including their relation to the larger artistic community, their association with other social and political organizations of the period and the ways in which mythologies have been built around them in subsequent histories and recollections of the period

*The Poster* Ruth E. Iskin, 2014-10-07 The Poster Art

Advertising Design and Collecting 1860s 1900s is a cultural history that situates the poster at the crossroads of art design advertising and collecting Though international in scope the book focuses especially on France and England Ruth E Iskin argues that the avant garde poster and the original art print played an important role in the development of a modernist language of art in the 1890s as well as in the adaptation of art to an era of mass media She moreover contends that this new form of visual communication fundamentally redefined relations between word and image poster designers embedded words within the graphic rather than using images to illustrate a text Posters had to function as effective advertising in the hectic environment of the urban street Even though initially commissioned as advertisements they were soon coveted by collectors Iskin introduces readers to the late nineteenth century iconophile a new type of collector curator archivist who discovered in poster collecting an ephemeral archaeology of modernity Bridging the separation between the fields of art design advertising and collecting Iskin s insightful study proposes that the poster played a constitutive role in the modern culture of spectacle This stunningly illustrated book will appeal to art historians and students of visual culture as well as social and cultural history media design and advertising

### **Medievalism in Technology Old and New** Karl Fugelso,Carol L. Robinson,2008

Medievalism examined in a variety of genres from fairy tales to today s computer games As medievalism is refracted through new media it is often radically transformed Yet it inevitably retains at least some common denominators with more traditional responses to the middle ages This latest volume of Studies in Medievalism explores this phenomenon with a special section on computer games examining digital echoes of the medieval past in subjects ranging from the sovereign ethics of empire in Star Wars to gender identity in on line role playing Medievalism in more conventional venues is also addressed ranging from early French fairy tales to nineteenth century neo Byzantine murals Great innovation and extraordinary continuity are thus juxtaposed not only within each article but also across the volume as a whole in yet further testimony to the exceptional flexibility and enduring relevance of medievalism

University    [Moving Modernism](#) Nell Andrew,2020-03-11 The emergence of modern dance and the early history of cinema ran concurrent with the European avant garde's development of pictorial abstraction in the first decades of the 20th century. However, many assume that modernist abstraction resulted from a century of natural autonomous evolution to painting styles and tastes. In [Moving Modernism](#) author Nell Andrew challenges this assumption. By examining dance and film created during this period, she argues that performative modes of art created the link between bodily movement and movement depicted in modernist paintings. In a seeming paradox, dance and film durational arts involving real bodies in space participated in the development of abstract art. With archival material collected in North America and Europe, [Moving Modernism](#) resurfaces lost performances, identifies working methods, and establishes the circles of aesthetic influence and reception for avant garde dance pioneers and experimental film makers from the turn of the century to the interwar period. Reexamining the motivation that fueled the emergence of abstraction, Andrew claims that painters sought meaning not only in the material and formal picture but also in temporal and sensorial experience. Andrew looks at major figures and intellectual movements including Loïe Fuller and Symbolism, Valentine de Saint Point and the Cubo-Futurist and neo-Symbolist movements, and early cinematic abstraction from Edison and the Lumière brothers to Hans Richter and Marcel Duchamp. Close examinations of each figure show that theatrical display embodied self-projection and kinesthetic desire are not necessarily in opposition to pictorial abstraction; in fact, they expand our understanding of the urges that created modern art.    [The Nabis & Their Period](#) Charles Chassé, 1969

Introduction

**Bonnard and the Nabis** Albert Kostenevitch, 2012-05-08

Pierre Bonnard was the leader of a group of post impressionist painters who called themselves the Nabis from the Hebrew word meaning prophet Bonnard Vuillard Roussel and Denis the most distinguished of the Nabis revolutionized the spirit of decorative techniques during one of the richest periods in the history of French painting Influenced by Odilon Redon and Puvis de Chavanne by popular imagery and Japanese etchings this post impressionist group was above all a close circle of friends who shared the same cultural background and interests An increasing individualism in their art often threatened the group's unity and although tied together by a common philosophy their work clearly diverged This publication lets us compare and put into perspective the artists within this fascinating group The works presented in this collection offer a palette of extraordinary poetic expressions candid in Bonnard ornamental and mysterious in Vuillard gently dream like in Denis grim and almost bitter in Vallotton the author shares with us the lives of these artists to the very source of their creative gifts
