Naming Necessity:

Naming and Necessity Saul A. Kripke, 1980 *Naming and Necessity* has had a great and increasing influence. It redirected philosophical attention to neglected questions of natural and metaphysical necessity and to the connections between these and theories of naming and of identity. This seminal work to which today's thriving essentialist metaphysics largely owes its impetus is here reissued in a newly corrected form with a new preface by the author. If there is such a thing as essential reading in metaphysics or in philosophy of language this is it.

In this collection of essays leading specialists explore issues arising from this and other works of Kripke's.

[The Collected Writings of Jaysankar Lal Shaw: Indian Analytic and Anglophone Philosophy](#) Jaysankar Lal Shaw, 2016-09-22 One of the first philosophers to relate Indian philosophical thought to Western analytic philosophy, Jaysankar Lal Shaw has been reflecting on analytic themes from Indian philosophy for over 40 years. This collection of his most important writings introduces his work and presents new ways of using Indian classical thought to approach and understand Western philosophy. By expanding, reinterpreting and reclassifying concepts and views of Indian philosophers, Shaw applies them to the main issues and theories discussed in contemporary philosophy of language and epistemology. Carefully constructed, this volume of his collected writings shows the parallels Shaw draws between core topics in both traditions such as proper names, definite descriptions, meaning of a sentence, knowledge, doubt, inference and testimony. It captures how Shaw uses the techniques and concepts of Indian philosophers, especially the followers of the Navya Nyaya, to address global problems like false belief, higher order knowledge and extraordinary perception. Exploring timeless ideas from Indian thought alongside major issues in contemporary philosophy, Shaw reveals how the two traditions can interact and throw light on each other, providing better solutions to philosophical problems. He has also reflected on modern issues such as freedom, morality and harmony from the classical Indian thought. Featuring a glossary and updates to his writings, *The Collected Writings of Jaysankar Lal Shaw: Indian Analytic and Anglophone Philosophy* also includes new work by Shaw on the relationship between Indian and analytic philosophy today.

Rationalized Epistemology Albert A. Johnstone, 1991-10-18 This book examines skeptical problems originally raised by Descartes and Hume and currently discussed in philosophy of mind, philosophy of language, metaphysics and epistemology. It answers the basic skeptical questions concerning the existence of what is now unperceived, the reality of what is perceived and the existence of an external world. Johnstone shows how the recently proposed solutions to these skeptical problems, pragmatic, coherentist, linguistic and new Kantian, do not and cannot work and how only a return to foundational investigation on the terrain of the radical skeptic is adequate to the task. His analyses make for a valuable summary of every significant argument brought against skepticism. In the course of his investigation, Johnstone probes a number of topical issues.
