Nanotech War:

The Nanotech War Steven Piziks,2002 **The Nanotech War** Steven Piziks,2012-10-02 In the furthest reaches of the Delta Quadrant the USS Voyager has encountered many strange and wondrous worlds but none so curious as that of the Chiar An advanced race whose scientists have become galactic experts in nanotechnology the Chiar have expanded inwards rather than out Every inch of their planet is crawling with the tiniest bits and pieces of artificial intelligence imaginable all of them working in concert to form the lifeblood of this mechanical world The Chiar themselves are inseparable from their nanobots which layer their skin and provide additional limbs or senses as required Caught up in internal political conflict some of the Chiar will take advantage of their meeting with the Starship Voyager to embark on an experiment which goes quietly but devastatingly out of control Never thinking that there could exist a technology they can't tame they believe that they can harness the awesome power of the Borg a conceit which soon turns out to be their most terrible mistake

Nanotechnology Rakesh Rathi,2009 An ideal book for the students of Undergraduate Post graduate of different Indian Universities and also useful for the students of B Tech B E of different Technical Universities of India This book is an attempt to provide you with the basic understanding of Nanotechnology Study material is simple on explanation and guide to further information is invaluable Efforts have been made to make the book error free Multiple choice questions have been especially designed to help students strengthen their understanding and the revision helps to imbibe their self confidence At the end of the book glossary is included The book is best companion for revision and examination guidance **Killer Robots** Armin

Krishnan,2016-04-22 Military robots and other potentially autonomous robotic systems such as unmanned combat air vehicles UCAVs and unmanned ground vehicles UGVs could soon be introduced to the battlefield Look further into the future and we may see autonomous micro and nanorobots armed and deployed in swarms of thousands or even millions This growing automation of warfare may come to represent a major discontinuity in the history of warfare humans will first be removed from the battlefield and may one day even be largely excluded from the decision cycle in future high tech and high speed robotic warfare Although the current technological issues will no doubt be overcome the greatest obstacles to automated weapons on the battlefield are likely to be legal and ethical concerns Armin Krishnan explores the technological legal and ethical issues connected to combat robotics examining both the opportunities and limitations of autonomous weapons He also proposes solutions to the future regulation of military robotics through international law **VOYAGE**

INTO THE UNKNOWN 9: THE KROTUS HORROR Collin R. Skocik,2017-04-27 In the depths of space on the twentieth anniversary of the supernova that destroyed the Earth the Space Star Silver Streak comes across an ancient space probe containing the infamous warlord of World War III Diana Krotus who has been discovered by Captain Cameron's old enemy Joshua Caruso When Krotus is revived she turns out to be a more complex person than the supervillain of history But Caruso still plots revenge against Cameron and Krotus has her own reasons to take over the Silver Streak The ensuing plot sows

discord among the Silver Streak's command crew sunders lifelong friendships and pits the command section against the civilian section as the distant past intrudes into the present **Nanovision** Colin Milburn, 2008-10-28 Examines the cultural history of nanotechnology in contemporary literature film and digital media **Communication Shock** Ty Adams, Steve Smith, 2015-09-04 In the spirit of Alvin Toffler's acclaimed works peering into the future of the technological society Communication Shock is a concise history of communication technologies and an exploration of the possible social and human impacts of nanotechnology on the ecology of human communication As we become increasingly more networked with communication technologies we must come to understand and confront the social impact of these changes More importantly we must wisely choose in embracing or rejecting these technologies and exploring how we might do both by striking an appropriate balance Grounded in communication theory and praxis Communication Shock brings some objectivity to the discussion of technology maps its development and encourages a rational conversation about its potential problems and promise It challenges readers to reach their own conclusions about the future imagined and unimaginable about the fundamental values in conflict and how one might choose to embrace or contest them to maintain individual autonomy in the face of increasingly ubiquitous marketing and technological change Present and emerging communications technologies hold the promise for a bold new future but they also have their inherent risks and drawbacks Communication shock is the human response conscious or unconscious wherein the individual chooses to resist the growing pervasiveness of technology in his or her life by seeking ways to reduce or redirect new technologies or to reject the addition of such technologies altogether Here is a framework for understanding the potential of the evolving technologies determining which are essential and which are distractions from the life that one believes to be meaningful and making informed choices for the life one wishes to live
