characterized as expanding their criminal repertoire while excusing their actions by rationalizations sometimes invented by sociologists psychologists and psychiatrists Although these ideas are of considerable interest the real value of the text lies in its intriguing presentation of drug user thinking Specifically three chapters are well worth reading The description of mental activities associated with such constructs as the high the nod and the rush are probably on target for many drug users whether criminal or not The chapter explaining drugs as facilitators offers several notions worthy of systematic inquiry as does the one devoted to principles for encouragement of behavior change Of perhaps greatest benefit to most readers are caveats regarding management of drug users in what may be seen as a cognitive behavioral framework Yochelson and Samenow contend that drug using criminal men represent the architects of their criminal life styles and that it is they themselves who can correct irresponsible thoughts and behaviors through application of logic over emotion Contemporary Psychology A Jason Arosen Book
