Narrativity Theory And Practice:

Narrativity Philip John Moore Sturgess, 1992 Defining narrativity as the enabling force of narrative this is the first full length exploration of the concept in fiction in English It develops the notion of a logic of narrativity and by this means tries to contribute a new critical strategy to the field of narrative theory The book also takes issue with a number of critical approaches that have in recent years acquired near orthodox status in the matter of textual interpretation Most prominent among these approaches are deconstruction and a particular form of Marxist criticism The author's own theoretical claims are substantiated by readings of major twentieth century novels by Conrad Joyce Flann O'Brien and Arthur Koestler and the book concludes with an analysis of an earlier narrative Maria Edgeworth's *Castle Rackrent* which illustrates the wider premises of the theory and its applications

A Structuralist-generative Model of Literary Narrative Volker Schulz, 2005 This study fills three of the most serious gaps in narrative theory and analysis of fiction Firstly it provides the long overdue first genuinely comprehensive model of literary narrative fiction Its structuralist generative nature allows to integrate the findings of most major theorists of the twentieth century The model is explained in detail and illustrated by a fold out chart Secondly in contrast to structuralist narrative theory the model is not a mere inventory of the various units of which a work of fiction consists Rather it elucidates the dynamic interplay of the literary narrative's various content components and discourse aspects which convey its thematic idea Thirdly the feasibility of the model is extensively demonstrated by the selective analysis of several short stories a novella and a novel In the appendix a student paper shows the model's heuristic didactic power at the level of advanced literary studies
