Keeping Pace with K-12 Online Learning

John Watson, Amy Murin, Lauren Vashaw, Butch Gemin, Chris Rapp, 2010 Keeping Pace has several goals First it strives to add to the body of knowledge about online education policy and practice and make recommendations for advances Second it serves as a reference source for information about programs and policies across the country both for policymakers and practitioners who are new to online education and for those who have extensive experience in the field Third because there has been so much online education activity in the past year the report attempts to capture new activity Readers who have reviewed Keeping Pace in recent years may note some changes to the organization of this year's report In particular with online learning growing in so many directions the authors have decided to organize the opening sections of the report into online program categories The reason for this is that the key issues in online learning e.g. funding student assessment are so different for the different categories that discussing funding across all the types of programs has become confusing In essence the authors have changed from organizing by topic e.g. funding to organizing by program type e.g. state virtual schools After an Executive Summary which provides a stand alone summary of key numbers issues and trends Online Learning Background Categories and Definitions is the report's introductory section It is meant for readers who are relatively new to K-12 online learning Because there are many terms in online learning without commonly understood definitions this section defines the key terms used in this report The State of K-12 Online Learning in 2010 begins with a snapshot of online learning in each state It then reviews the number of schools and students taking online courses in several categories state virtual schools full time statewide online schools district programs and consortium programs Emerging Issues and Trends reviews blended learning including use of blended learning in school turnarounds competency based learning and mobile learning The Outlook and Conclusion looks at how blended learning represents a synthesis of online learning and computer based instruction and how that plays into future adoptions particularly at the district level The State

Policy Profiles contain online learning profiles of all fifty states in alphabetical order. Most state profiles include footnotes that reference state laws and state policies. However, in some cases the information is general and was gathered through numerous website reviews and phone interviews with state agencies; in these cases, footnotes are not included. The primary purpose of footnotes is to provide the source documents that will be most valuable to readers. Contains 9 figures, 18 tables, and 332 footnotes. Additional funding for this paper was provided by North Carolina Virtual Public School. Whiteside, Amy Garrett Dikkers, Karen Swan, 2023-07-03. Published in Association with 2020 AECT Division of Distance Learning Book Award. Social presence continues to emerge as a key factor for successful online and blended learning experiences. It is commonly described as the degree to which online participants feel connected to one another. Understanding social presence with its critical connections to community building, retention, and learning outcomes allows faculty and instructional designers to better support and engage students. This volume, *Social Presence in Online Learning*, addresses the evolution of social presence with three distinct perspectives, outlines the relevant research, and focuses on practical strategies that can immediately impact the teaching and learning experience. These strategies include creating connections to build community, applying content to authentic situations, integrating a careful mix of tools and media, leveraging reflective and interactive opportunities, providing early and continuous feedback, designing with assessment in mind, and encouraging change in small increments. Because student satisfaction and motivation plays a key role in retention rates, and because increased social presence often leads to enriched learning experiences, it is advantageous to mindfully integrate social presence into learning environments. *Social Presence in Online Learning* brings together eminent scholars in the field to distinguish among three different perspectives of social presence and to address how these viewpoints immediately inform practice. This important volume provides an overview of the evolution of social presence, key findings from social presence research, and practical strategies that can improve the online and blended learning experience. Differentiates three distinct perspectives on social presence and explains the ideas and models that inform these perspectives. Explores specific ways in which social presence relates to course satisfaction, retention, and outcomes.
