Oxygen/Nitrogen Radicals: Cell Injury and Disease Val Vallyathan,Vince Castranova,Xianglin Shi,2002-07-31 A veritable mountain of literature has been published showing the causal relationship of reactive oxygen nitrogen species in human disease conditions and there has been an explosion in the understanding of oxidative stress the protective role of antioxidants and molecular events involved in the regulation of transcription editing and translation of key events leading to disease processes Strategies need to be developed for prevention of diseases by allowing scientists and clinicians to obtain information on new and emerging advances The molecular mechanisms involved in several diseases including Alzheimer s disease atherosclerosis diabetes arthritis and Parkinson s disease as well as disorders of the eye skin cardiac and pulmonary systems are discussed in this volume along with scientific evidence supporting the value of dietary supplementation with antioxidants in the prevention of cellular damage leading to chronic disease Special in vivo techniques are also discussed at length along with the role of molecular studies in human risk assessment

Val Vallyathan,2004-04 **Free Radicals and Inflammation** Paul G. Winyard,David R. Blake,C. H. Evans,2000 The book deals with the role of both oxygen and nitrogen centred free radicals in inflammatory diseases such as rheumatoid arthritis The well known involvement of the superoxide anion radical in the bactericidal action of inflammatory cells suggests that radicals and the inflammatory response are inextricably linked The widespread involvement of radicals in human disease seems inevitable because inflammation is such a conspicuous component of human disease For the first time the present text integrates contributions from leading research groups who have been investigating the role of radicals within the context of all stages of inflammtion such as the recruitment of inflammatory cells their bactericidal action inflammatory tissue destruction and inflammatory cell death by apoptosis The chapters are broadly organised so that they trace the clinical course of the acute and chronic inflammtory response emphasising the therapeutic implications of recent data on the contribution of nitric oxide and related nitrogen centred species The book will be of interest to academic and industrial researchers and clinicians with interests in the fields of inflammation or free radical biology **Oxygen/nitrogen Radicals and Cellular Injury** Kenneth B.
