Trauma Healing Global Trend:

Health, Healing, and Shalom Bryant L. Myers, Erin Dufault-Hunter, Isaac B. Voss, 2015-11-17 Frontiers and Challenges for Christian Healthcare Missions Ever since Jesus's proclamation in word and deed as the Great Physician his followers in mission have assumed that salvation and health are intertwined. Yet for every age Christians need to examine how they can best announce the gospel message of God's healing in word and deed in their own context. In our era we are often simultaneously grateful for modern medicine and frustrated by its inability to care for the whole person in effective, affordable ways. In this edited volume authors with an interest in health missions from a wide variety of experiences and disciplines examine health and healing through the theological lens of shalom. This word often translated peace names a much more complex understanding of human well being as right relationships with one another with God and with creation. Reading various aspects of healthcare missions through these glasses not only yields much needed correctives to current practice but also exposes the Spirit's invitation to participate in God's ongoing work of tending, caring and healing our broken world.

Integrated

Care for the Traumatized Ilene A. Serlin, Stanley Krippner, Kirwan Rockefeller, 2019-07-12 Integrated Care for the Traumatized puts forth a model for the future of behavioral health focused on health care integration and the importance of the Whole Person Approach (WPA) in guiding the integration. This book fills a void applying the WPA integration to the traumatized that enables the reader to learn from experienced trauma practitioners on how to assess and treat trauma as humanely and compassionately as possible. This approach of expanding the possibilities of behavioral health by centering upon the whole person is an old idea that is emerging as a modern solution to over specialized practices. Among other things this WPA approach completed with spirituality, psychology, medicine, social work, and psychiatry helps traumatized and their families function in the social environment. The book has four sections: Foundations, Interventions for Individuals, Interventions for Communities, and Future of Integrative Care for the Traumatized. Each chapter discusses the importance of working within an integrative and WP approach with descriptions of integrative models, research, evidence, and applications that are already working. These chapters can help students, families, and seasoned professionals to improve upon and expand their practice with the traumatized in both the individual and community contexts.

in a country exhibiting high rates of undiagnosed mental illness and low mental health literacy in the rural provinces which demonstrate the highest mental health burden A gradual yet targeted integration of Buddhist spiritual personnel and institutions with psychological and psychosocial support NGOs would be efficacious in enhancing the cultural competency of NGOs approaches while also extending the geographic reach of counseling efforts and resources to the most marginalized in the country In Cambodia trauma lingering from the Khmer Rouge era genocide combined with that produced by compounded social issues including child sexual abuse human trafficking and gender based violence GBV contribute to one of highest rates in the world of what a Western diagnostic model would define as PTSD Such imbricated realities in Cambodia remain stigmatized taboo and misunderstood within Khmer society oftentimes hindering the healing process for survivors at the individual and community levels NGOs analyzed in this study seek to provide psychological and psychosocial support to those experiencing trauma from these events and concurrently promote education on these issues Considering the predominantly Western origins of national NGO donors this study is one of the first to examine cultural competence in the context of national NGOs and trauma stemming from contemporary violence in Cambodia My research examines the impact and sustainability of these organizations approaches toward supporting the holistic healing needs of those experiencing trauma or distress with an eye toward how Therav da Buddhist principles are incorporated into these support and development methods Adoption of a Buddhist spiritual lens was informed and encouraged by both primary and secondary research that revealed the healing and social development tools immanent within Buddhist teachings Serving Vulnerable and Marginalized Populations in Social and Educational Contexts Anies Al-Hroub,Sally Reis,Joseph Madaus,Itab
