One of the primary principles of Economics is that human needs are insatiable The more you meet them the more they seem to reappear The more money we make the more we need to make We need money to meet all our pressing routine and daily needs Without money to meet these needs we will be at the mercy of circumstances and events Money is a reward for the creation and the delivery of value Money is not a reward for your spirituality your prayer your morality your religious activity your charitable activities your educational qualifications or your race Money is a reward for value Some people think that religious activities and acts of kindness will somehow translate into attracting money to you This is not true The same goes for people who believe the universe will grant them every intention on their mind without creating and delivering any form of value They make many affirmations with the intention of attracting riches But good intentions and affirmations without action is self delusion For your affirmations to come into manifestation you have to take action This book will show you some strategies to help you become financially independent Mastering Money Management William Ubagan,2025-01-15 In
