Masterpieces Of Bird Art 700 Years Of Ornithological Illustration:

Masterpieces of Bird Art Roger F. Pasquier, John Farrand, 1991 **The Abyssinian Art of Louis Agassiz Fuertes in the Field Museum** Paul Johnsgard, 2020 This book documents the paintings and drawings executed by Louis Agassiz Fuertes during the Field Museum of Natural History's seven month expedition to Ethiopia Abyssinia in 1926-27. During that time Fuertes completed 70 field watercolors that illustrate 55 species of birds and four species of mammals. He also executed 34 pencil drawings which illustrate 13 species of mammals and 11 species of birds plus numerous miscellaneous sketches and small watercolors. This book identifies and describes the biology of all 69 species of birds and mammals illustrated by Fuertes and includes 32 color reproductions of Fuertes's watercolors that were published as a limited edition album in 1930 by the Field Museum. The 60,000 word text provides brief summaries of all these species' ecology, behavior, and reproductive biology, as well as information about their current populations and conservation status. A review of Fuertes's life, his influence on modern bird and wildlife art, and his participation in and artistic contributions to the Field Museum's Abyssinian Expedition is also included, as well as more than 250 bibliographic citations.

Bird-watcher's Bible Jonathan K. Alderfer, 2012 A guide to bird watching covers topics ranging from mythology and birdhouses to the work of Audubon and Angry Birds, combining images with trivia, top ten lists, and bird watching guidelines.

Humans, Nature, and Birds Darryl Wheye, Donald Kennedy, 2008-01-01 This book invites readers to enter a two floor virtual gallery where 60 plus images of birds reflecting the accomplishments of human pictorial history are on display. These are works in a genre the authors term Science Art, that is art that says something about the natural world and how it works. Darryl Wheye and Donald Kennedy show how these works of art can advance our understanding of the ways nature has been perceived over time, its current vulnerability, and our responsibility to preserve its wealth. Each room in the gallery is dedicated to a single topic. The rooms on the first floor show birds as icons, birds as resources, birds as teaching tools, and more. On the second floor, the images and their captions clarify what Science Art is and how the intertwining of art and science can change the way we look at each. The authors also provide a timeline linking scientific innovations with the production of images of birds, and they offer a checklist of steps to promote the creation and accessibility of Science Art. Readers who tour this unique and fascinating gallery will never look at art depicting nature in the same way again. Published with assistance from the Alfred P. Sloan Foundation's Public Understanding of Science and Technology Program.
