Materialist Conception Of History A Critical Analysis:

The Materialist Conception of History, 1971 **Francis Fukuyama and the End of History** Howard Williams, E Gwynn Matthews, David Sullivan, 2016-07-20 Fukuyama's concept of the End of History has been one of the most widely debated theories of international politics since the end of the Cold War. This book discusses Fukuyama's claim that liberal democracy alone is able to satisfy the human aspiration for freedom and dignity and explores the way in which his thinking is part of a philosophical tradition which includes Kant, Hegel and Marx. Two new chapters in this second edition discuss the ways in which Fukuyama's thinking has developed; they include his celebrated and controversial criticism of neoconservatism and his complex intellectual relationship to Samuel Huntington whose Clash of Civilizations thesis he rejects but whose notion of political decay is central to his more recent work. The authors here argue that Fukuyama's continuing fundamental contributions to debates concerning the spread of democracy and threat of global terror mark him out as one of the most important thinkers of the twenty-first century.

Max Weber and Karl Marx Karl Lowith, 2002-11-01 First Published in 2004 Lowith's study of Max Weber and Karl Marx is a key text in modern interpretations of the theme of alienation in Marxist theory and rationalisation in Weber's sociology. It remains the best short student introduction to the differences and comparisons between these essential thinkers. This new edition includes a Preface by Professor Bryan S Turner which demonstrates the relevance of the book for contemporary sociology.

Socialism; a Critical Analysis Oscar Douglas Skelton, 1911

Marx's Ecology John Bellamy Foster, 2000-03-01 Progress requires the conquest of nature. Or does it? This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis. Marx: it is often assumed cared only about industrial growth and the development of economic forces. John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology, philosophical naturalism and evolutionary theory. He shows that Marx, known as a powerful critic of capitalist society, was also deeply concerned with the changing human relationship to nature. Marx's Ecology covers many other thinkers including Epicurus, Charles Darwin, Thomas Malthus, Ludwig Feuerbach, P. J. Proudhon and William Paley. By reconstructing a materialist conception of nature and society, Marx's Ecology challenges the spiritualism prevalent in the modern Green movement, pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis.

Karl Marx and the Critical Examination of His Works Leslie R. Page, 1987

Marx's Temporalities Massimiliano Tomba, 2012-11-09 The book rethinks key categories of Marx's work beyond any philosophy of history, showing how the plurality of temporal layers that are combined and come into conflict in the violently unifying historical dimension of modernity are central to Marx's thought.
