**Partnering With Parents in Elementary School Math** Hilary Kreisberg, Matthew L. Beyranevand, 2021-02-03 How to build productive relationships in math education I wasn't taught this way I can't help my child These are common refrains from today's parents and guardians who are often overwhelmed confused worried and frustrated about how to best support their children with what they see as the new math The problem has been compounded by the shift to more distance learning in response to a global pandemic Partnering With Parents in Elementary School Math provides educators with long overdue guidance on how to productively partner and communicate

with families about their children's mathematics learning. It includes reproducible surveys, letters, and planning documents that can be used to improve the home-school relationship, which in turn helps students, parents, teachers, and education leaders alike. Readers will find guidance on how to understand and empathize with what fuels parents' anxieties and concerns. Align as a school and set parents' expectations about what math instruction their children will experience and how it will help them. Communicate clearly and productively with parents about their students' progress, strengths, and needs in math. Run informative and fun family events. Support homework. Coach parents to portray a productive disposition about math in front of their children. Educators, families, and students are best served when proactive, productive, and healthy relationships have been developed with each other and with the realities of today's math education. This guide shows how these relationships can be built.

**Making Sense of Mathematics for Teaching the Small Group** Juli K. Dixon, Lisa A. Brooks, Melissa R. Carli, 2018-07-06 When done right, small group instruction is a powerful tool for facilitating student understanding in K-5 mathematics. Throughout the book, best practices for small group math instruction are addressed in detail, from planning tasks that encourage deep understanding to asking effective questions to engaging learners in meaningful conversations. Readers will learn how teaching mathematics in small groups allows you to differentiate instruction for both remediation and enrichment. The included small group instruction videos demonstrate the suggested strategies in a real classroom setting, giving readers the opportunity to see best practice in action. Develop math-specific instruction strategies for teaching small groups in elementary school. Explore the benefits of small group math activities and how these activities are unique compared to large group instruction. Discover the teacher's and students' roles in small group instruction and how teachers can help students develop the skills to fulfill their role. Learn how to apply the general tasks, questions, and evidence (TQE) process to small group instruction in order to enhance student learning and improve your knowledge of teaching mathematics. View examples of small group instruction which provide both math intervention and math enrichment activities for different students. Contents: Acknowledgments, Table of Contents, About the Authors, Introduction, Chapter 1: Best Practices in Small Group Instruction, Chapter 2: The TQE Process in Small Group Instruction, Chapter 3: Discourse in Small Group Instruction, Epilogue: How to Tie It All Together, References, Index.

**Elementary School Teachers' Mathematics Instructional Decision Making in the Context of District Mandates on Instruction** Heather Anne Martin, 2008 In the current educational climate teachers in low performing schools are experiencing pressure from state and district policy makers to raise student performance on state tests Some district administrations have undertaken various measures including implementing numerous and specific mathematics content standards adopting particular curricular packages and requiring teachers to use them as their primary instructional materials and even creating pacing guides with uniform timelines for presenting lessons to students These efforts have had the cumulative effect of urging teachers to stick closely to a standard curriculum in order to raise student test scores Teachers must also interpret and attend to the needs of their students and ideally teach their students to understand mathematical concepts and processes as opposed to narrowly mastering procedural skills It may not always be possible to both follow administrative mandates about instruction and meet student needs and teachers may have to make a compromise between these two objectives In this study I examined how elementary school teachers in a particular accountability pressured school decided to teach mathematics Drawing on multiple interviews and ten classroom observations per teacher I created portraits of the mathematics instructional choices of four second grade teachers including their use of instructional materials such as textbooks I drew on an analytical framework adapted from Stein Grover and Henningsen 1996 to assess various features of the lesson in order to note the interaction between the materials and the teachers decisions about how to use them I developed a lesson signature for each teacher a visual representation of the typical organization of the teacher s lessons and how materials were used within them My findings indicated that the teachers individual goals for their teaching beliefs about their students needs and interpretations of the district s curricular mandates interacted to steer their instructional choices to very different results Two of the teachers dutifully followed the textbook while two essentially disregarded it in favor of other materials Teachers own senses of their autonomy to make curricular decisions and their support for their students autonomy in learning math emerged as important factors I suggest implications for teacher professional development and curricular materials development
