After addition the lessons focus on column subtraction initially without regrouping and then with regrouping. The lesson Regrouping practices breaking down a ten into 10 ones. It is crucial that the child understands what happens here. Otherwise they might end up only memorizing the procedure and will probably at some point misremember how it was done. If you notice that the child does not understand the concept of regrouping provide more practice with concrete manipulatives or visual exercises before proceeding. After learning regrouping students practice mental subtraction in two separate lessons. One of them expounds on several methods for mental subtracting. The other is about Euclid's game a fun game that also practices subtraction of two digit numbers. **40 Fun-Tabulous Puzzles for Multiplication, Division, Decimals, Fractions, and More** Bob Olenych, 2000-11. The world lies devastated after the massive oil crisis that was described in LAST LIGHT. Human society has more or less entirely broken down and millions lie dead of starvation and disease. There are only one or two beacon communities that have managed to fashion a new way of living. Jenny Sutherland runs one of these groups. Based on a series of decaying offshore oil rigs for safety a few hundred people have rebuilt a semblance of normality in this otherwise dead world. But as her and her people start to explore their surroundings once again they start to realise not every survivor has the same vision of a better future than their catastrophic past. There are people out there who would take everything they have. War is coming and the stakes are truly massive. [Essentials of WIAT-III and KTEA-II Assessment](#) Elizabeth O.
