Origin Of Humankind:

The Origin Of Humankind Richard Leakey, 1994 The Origin of Humankind is Richard Leakey's final statement on human evolution. Deriving its power from the author's unquestioned authority in the field of paleontology and enriched by his new interest in wildlife this book answers the question What made humans human? Leakey argues that when one of our hominid ancestors acquired the ability to walk upright called bipedalism the evolution of modern humans became possible perhaps even inevitable. All other human evolutionary refinements and distinctions can be seen as related to this one dramatic step. In fascinating sections on how and why modern humans developed a social organization culture and personal behavior Leakey enhances our understanding of the nature and evolutionary role of art language and human consciousness

The Origins of Humankind Stephen Tomkins, 1998-07-23 The text starts explaining the theory of evolution and further chapters discuss the human journey

The Origin of Humankind Massimiliano Aloisi, 2000 This volume deals with the fascinating topic of the origin of humankind. Some of its important areas from palaeontology to genetics have yielded striking contributions. However it also has aspects that transcend science and probe deeply into domains that do not pertain to scientific culture proper such as religion and philosophy. The volume brings together contributions from a group of palaeontologists and geneticists who present an update of knowledge on the topic the Out of Africa theory the demise of the Neanderthal and the Italian scene

Origin of Humankind Sam Kneller, Humankind At the same time it's best friend and its worst enemy. We're capable of the Declaration of Human Rights and Genocide sending a man to the moon and polluting our oceans. Why are we inhabited by such extreme objectives? What is the origin of such a paradoxical humankind? Humans can be angels Mother Teresa Schindler and Dr Jekyll. The Bible calls this righteousness. Humans can be demons Saddam Hussein Stalin and Mr Hyde. The Bible calls this sin. We want humans to be loving kind peaceful and happy. But Are we human angels or human demons? We need to figure out what makes humans tick. Are we subject to our consciousness and mind pulsations? Do we have any choice in the matter? The clock is ticking. When it stops will it be heaven or hell? I commend anyone who takes measures to look beyond the surface meaning of scriptures since there's so much hidden in Biblical text. People who take it at surface value often miss precious gems of wisdom D Robinson. This commentary on Genesis 2 is an eye opening solution to the human paradox. Learn the origin of consciousness and the mind. Join all the dots as we delve into the Biblical Hebrew the original language of the Bible. The First Humans J. Peter White, 1994 *The Origin of Humankind* Richard E. Leakey, 2006-07 The study of human origins can never stand still as new fossils are constantly being discovered theories of the ancestral tree are being rejigged to accommodate the newcomers. Leakey has been one of the most prolific discoverers of human fossils is ideally placed to describe the complexities of human evolution. Leakey has always been interested in far more than the mere physical features presented by fossils here he is particularly concerned with non tangible human attributes such as art language consciousness itself. He gives a fair

Man As the Prayer Yup Lee,2000 In this book a totally new picture of five million years of human evolutionary history is presented Male and female hominids lived separately in different areas for most of the last five million years They met together once a year and stayed together for a brief period What they did for and during this annual mating season is the key to the proper and correct understanding of human evolution Five million years ago the last common ancestors of the African great apes and humans lived in an extensive rain forest encompassing a river and a lake There was a system of mountains a lake and a river all of which were linked together Ever since then mountains rivers and lakes were intimately involved with humankind When the climate turned arid the riverside forest broke into fragments of small forests In desperate need of food the last common ancestors were forced to visit the trees which dotted the river shore They developed a unique mode of terrestrial locomotion to move between the main forest and the scattered patches of forest One day during drought a small group of apes ventured to a faraway tract of forest beside the river On the road they were caught in heavy rain and in

the resulting frenzy they lost their way back home During their wanderings they evolved into gorillas Almost at the same time another small group of apes met the same fate and evolved into chimpanzees As the climate grew increasingly arid the year divided itself into dry and wet seasons During the dry season males were forced to remain in the nearby mountain ranges because there weren't enough food in the home forest to support both males and females As a result males and females parted ways during the annual dry season These were the ancestral hominids who evolved into australopithecines Two and a half million years ago as the climate became increasingly arid the forest surrounding the lake began to break up and disappear Finally the female hominids the inhabitants of the forest at the margin of the lake were forced down to the ground They became fully terrestrial but they did not know where to find food and water Consequently females began to follow herds of Hippopotamus horses Later they switched to one-toed horses Following these migrating horses some hominids ended up in East Asia from Africa about 2 million years ago In the same fashion some hominids later wound up in Europe In the meantime male hominids developed and acquired unique behavior As rain began to fall they went downstream to their courting ground There they beat the ground with sticks to attract and seduce mates They beat pebbles sand the bones of dead animals or anything else on the ground leaving behind piles of fractured dented and broken bones These stone debris are erroneously called Oldowan tools by archaeologists and anthropologists Rain was so important to our remote ancestors because the rain was a harbinger of the brief annual mating season They prayed for the coming of rain as the climate became arid They prayed earnestly by beating the ground with sticks in their place of courtship In due course hominids became prayers Later as rain began to fall irregularly the rain lost its foremost importance Instead the horse ascended in importance Now males prayed for the coming of the horse accompanied by their mates About 32 000 years ago Upper Palaeolithic Europeans began to pray for the coming of the horse by carving engraving and painting horses on the cave walls Painting was simply another version of prayer The same was true for language Human language was developed out of verbal prayer In this book the common thread running through the entire history of human evolution is crisply and clearly explicated The origins of construction music sculpture handicrafts painting and languages are all clarified as variations of the same theme That theme was prayer Comprehensive Study of the Origin of Humankind Ryanne Maxine Meyersohn, 2023-02-25 AWARD WINNING BOOK Silver Medal Readers Favorite International Book Award Contest and 5 Stars Book Reviews Literary Titan Gold Book Award and 5 Stars Book Reviews Amazon Bestseller 1 History of the Middle East and 2 Ancient Early Civilization History The Anunnaki gods from the planet Nibiru carried out a mission on Earth and the story was documented in clay tablets or Mesopotamian texts discovered in the ruins of buildings in the Middle East Scholars have proposed that some Genesis stories had already appeared in Mesopotamian texts thousands of years ago This proposal motivated us to evaluate the most relevant texts Although most scholars believe that the Mesopotamian texts are mythology the research was carried out under the premise that their content corresponds to real events Analysis of academic translations of the texts revealed

that many details critical to understanding the story have not been revealed An exhaustive analysis of the data determined the most probable dates of the events The book presents the events related to the arrival of the Anunnaki to Earth and the consequences of their mission chronologically according to findings in Mesopotamian texts and ancient books Various sources including apocryphal books reports from ancient historians scientific research and archaeological records supplemented the research Many riddles were decoded including who the Anunnaki and the Igigi watchers Nephilim were Why when and how did H sapiens originate how did the other species arise and why did they become extinct Why and when did the Anunnaki arrive and finally leave Earth When will the planet Nibiru return to our area in the inner solar system The results and findings of this research deserve to be known due to the probability that the stories in the Mesopotamian texts really happened The book s proposals differ from what we have learned in educational institutions about the origin of humanity and invite critical thinking to reflect on the history of the Anunnaki gods Enthusiastic readers of the extraterrestrial theme will find innovative proposals
