*Orthomorphism Graphs of Groups* Anthony B. Evans, 2006-11-15 This book is about orthomorphisms and complete mappings of groups and related constructions of orthogonal latin squares It brings together for the first time in book form many of the results in this area The aim of this book is to lay the foundations for a theory of orthomorphism graphs of groups and to encourage research in this area To this end many directions for future research are suggested The material in this book should be accessible to any graduate student who has taken courses in algebra group theory and field theory It will mainly be useful in research on combinatorial design theory group theory and field theory *Orthogonal Latin Squares Based on Groups* Anthony B. Evans, 2018-08-17 This monograph presents a unified exposition of latin squares and mutually orthogonal sets of latin squares based on groups Its focus is on orthomorphisms and complete mappings of finite groups while also offering a complete proof of the Hall Paige conjecture The use of latin squares in constructions of nets affine planes projective planes and transversal designs also motivates this inquiry The text begins by introducing fundamental concepts like the tests for determining whether a latin square is based on a group as well as orthomorphisms and complete mappings From there it describes the existence problem for complete mappings of groups building up to the proof of the Hall Paige conjecture The third part presents a comprehensive study of orthomorphism graphs of groups while the last part provides a discussion of Cartesian projective planes related combinatorial structures and a list of open problems Expanding the author's 1992 monograph *Orthomorphism Graphs of Groups* this book is an essential reference tool for mathematics researchers or graduate students tackling latin square problems in combinatorics Its presentation draws on a basic understanding of finite group theory finite field theory linear algebra and elementary number theory more advanced theories are introduced in the text as needed
