**Mansour Ghorbani**

## Paleozoic Formations In Central Elburz:

*Sedimentary Basins and Petroleum Geology of the Middle East* A.E.M. Nairn,A.S. Alsharhan,1997-12-11 The wealth of petroleum has made the Middle East one of the most actively explored regions of the world The volume of geological geophysical and geochemical data collected by the petroleum industry in recent decades is enormous The Middle East may be a unique region in the world where the volume of subsurface data and information exceeds that based on surface outcrop This book reviews the tectonic and geological history of the Middle East and the regional hydrocarbon potential on a country by country basis in the context of current ideas developed through seismic and sequence stratigraphy and incorporating the ideas of global sea level change Subsurface data have been used as much as possible to amplify the descriptions The paleogeographic approach provides a means to view the area as a whole While the country by country approach inevitably leads to some repetition it enhances the value of the volume as a teaching tool and underlines some of the changing lithologies within formations carrying the same name

### **Lithostratigraphy of Iran** Mansour Ghorbani,2019-01-17

This book discusses the entire lithostratigraphy of Iran from the Proterozoic to recent This unique book manages to elucidate the stratigraphy of Iran after an exhausting and long term process the creation of a comprehensive stratigraphic framework required input from many Iranian specialist stratigraphers a process which will be ongoing in the future However the main purpose of this work is to provide a concise summary of the state of the art of the lithostratigraphy for Iranian formations The geology of the various sedimentary basins is described for each geological time period together with the constituent lithostratigraphic units The available stratigraphic data are summarized in tables providing all relevant references Finally the book presents the spatial and temporal distribution of the various formations together with their geographic locations type sections and lithological composition

### **South Caspian to Central Iran Basins** Marie-Françoise Brunet,Markus

Wilmsen,James W. Granath,2009 This book combines interdisciplinary research results using structural geology geophysics sedimentology stratigraphy palaeontology palaeomagnetism and subsidence modelling obtained through the MEBE Middle East Basins Evolution Programme and other groups in the South Caspian and Northern and Central Iran A great part of the volume is devoted to Northern Iran Alborz Binalud and Koppeh Dagh belts dealing mainly with the Late Palaeozoic and the Mesozoic Eras Two papers present subsidence models of the South Caspian Basin since the Jurassic and three papers focus on Central Iran The data and models in this compilation of papers present a detailed picture and a very comprehensive understanding of the Late Palaeozoic to Cenozoic evolution of the South Caspian and North Iran to Central Iran basins Geodynamic evolution and sedimentation are mainly controlled by the closure of the Palaeo Tethys due to collision of Eocimmerian blocks with south Laurasia opening of the South Caspian Basin and Neo Tethys ocean closure associated with Arabia Eurasia collision

### **The Palaeozoic** Michel Moullade,A. E. M. Nairn,1991 Hardbound This first volume in The

Phanerozoic Geology of the World series devoted to the Palaeozoic is an assemblage of contributions dealing mainly with

fragments of the former Gondwana Data is included which is not readily available elsewhere Each chapter contains a comprehensive bibliography to serve as a resource base for more detailed study **Tectonic Evolution, Collision, and Seismicity of Southwest Asia** Rasoul Sorkhabi,2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding large magnitude earthquakes volcanic landscapes petroliferous foreland basins historical civilizations as well as geologic outcrops that display the protracted and complex 540 m y stratigraphic record of Earth s Phanerozoic Era Emerged from the birth and demise of the Paleo Tethys and Neo Tethys oceans southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia Arabia continental plates The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros Alborz Caucasus Taurus and Pontic mountains the region also includes the strategic marine domains of the Persian Gulf Gulf of Oman Caspian and Mediterranean This 19 chapter volume published in honor of Manuel Berberian a preeminent geologist from the region brings together a wealth of new data analyses and frontier research on the geologic evolution collisional tectonics active deformation and historical and modern seismicity of key areas in southwest Asia *Geology of the Surmaq-Deh Bid Area, Abadeh Region, Central Iran* H. Taraz,1974 [The Permian of Northern Pangea](#) Peter A. Scholle,Tadeusz M. Peryt,Dana S. Ulmer-Scholle,2012-12-06 The Permian was a remarkable time period It represents the maximum stage of Pangean continental assembly includes a major global climatic shift from glacial to nonglacial conditions icehouse greenhouse transition and is terminated by one of the most profound faunal floral extinction events in the Earth s history In addition Permian oceans although poorly understood must have had some quite unique characteristics Permian seas reached the most extreme values of carbon sulfur and strontium isotopic ratios ever achieved in Phanerozoic time and the isotopic ratios of all three elements abruptly returned to more normal values at or very close to the Permo Triassic boundary Finally the Permian is marked by an abundance of important sedimentary mineral resources It has large fossil fuel concentrations coal oil and natural gas enormous phosphate reserves and very extensive evaporite deposits including gypsum anhydrite and halite as well as a variety of potash salts Study of the Permian has been hampered however by a number of factors These include a scattered geologic literature presented in a variety of languages a confusing regional and global stratigraphic framework based in part on inadequate type sections and largely provincial often poorly correlatable faunas All have contributed to the sparsity and inadequacy of overviews of this critical geological interval These two volumes attempt to bring together some of the widely scattered observations about these fascinating rocks at least for the northern predominantly nonglacial parts of Pangea *Geology and Mineral Resources of the Soltanieh Mountains (Northwest Iran)* J. Stöcklin,M. H. Nabavi,M. Samimi,1965 **Permian Limestone with Holothurian Sclerites, Semnan Area, South-central Alborz, Iran** M. H. Nabavi,B. Hamdi,1975 *Brachiopoda* David A. T. Harper,Sarah L. Long,Claus Nielsen,2008 This substantial volume showcases 35 of the presentations delivered at the 5th International Brachiopod Congress in Copenhagen The brachiopod congresses are a focus

for cutting edge research in brachiopod palaeontology and neontology The presentations from the Copenhagen Congress cover a wide range of material from basic morphology and taxonomy through advances in molecular phylogeny and ultrastructural studies to the biogeography and palaeoecology of the phylum About 75% of the papers relate to fossil brachiopods and the rest to living forms The following fields are represented in the volume Taxonomy Morphology 25% Ecology Palaeoecology 35% and Stratigraphy Biogeography 20% phylogeny 10% and Biochemistry Genetics 10% The volume is beautifully illustrated throughout and the papers together represent an exciting snapshot of contemporary brachiopod research as it continues into the third millennium

**Lower Palaeozoic of the Middle East, Eastern and Southern**

**Africa, and Antarctica** Charles Hepworth Holland,1981      **The Phanerozoic Geology of the World** Michel Moullade,A.
