Meaningful Environments: Architectural Precedents and the Question of Identity in Creative Design Ali

Guney, 2008-10-15 *Understanding Meaningful Environments Architectural Precedents and the Question of Identity in Creative Design* intends to put forward a discussion on the use of precedents and the production of innovative designs as well as to discuss the relationship between precedents and identity in a world undergoing a rapid process of globalization This publication provides insights into how the strategy of making use of design precedents as a source of knowledge rather than initiating a project from tabula rasa leads to efficient effective and or innovative results based in particular on the work of Le Corbusier and Santiago Calatrava In the sense that architects ideologies and intentions did not form a main position in this account one may say that it is not a value added approach However in this publication this other side of the use of precedents is explored i e recollection and intention because in addition to innovations the critical use of precedents seems to help in the production of buildings places that embody a critical notion of identity The goal of this study is to provide a reflection on the themes mentioned as well as to briefly discuss methods for precedent analysis

Sustainable Approaches to Urban Transport Dinesh Mohan, Geetam Tiwari, 2019-07-02 As cities become increasingly congested current transport patterns are unsustainable heavy in energy use high in economic and environmental cost and exacerbating inequity between those who can access high speed travel and those who cannot Good urban planning develops human scale cities and encourages modes such as bicycles increased zones exclusive to pedestrians within cities and changed fiscal policies to incentivize public over private transport Equally it requires good engineering design to manage road use *Sustainable Approaches to Urban Transport* brings together contributions from leading international experts in urban planning transport and governance who suggest changes to make our cities more sustainable in the face of climate change All professionals working in transport and engineering and planning students will find an overview of a broad field in this interdisciplinary collection of essays

Holland Real Estate Yearbook 2007 , Guidebook for Air Cargo Facility Planning and Development Mike Maynard, 2015 The guidebook presents a broad discussion of the various issues that must be addressed in planning air cargo facilities It describes tools and techniques for sizing facilities including data and updated metrics necessary to forecast future facility requirements as a function of changing market and economic conditions The procedures offered support airport

operators in crafting effective business plans and development decisions that meet the industry's current and future technological, operational and security challenges in a cost effective, efficient and environmentally sensitive manner

Coastal and Marine Environmental Management Asian Development Bank, 1995 *Mecanoo: Van Fragmentarisch Naar Monumentaal* Francine Houben, Aaron Betsky, Ruud Brouwers, 2008 Presents a profile of a contemporary European architectural practice emphasizing sustainability and social responsibility **Mecanoo** Pietro Valle, 2007 Founded in Delft in 1984 as a collective for public housing design the Mecanoo studio has developed into one of the most significant entities on both the Dutch and international architecture scene Under the guidance of partners Francine Houben, Henk Doll, Michel Tombal and Aart Fransen Mecanoo has developed a personal revision of the modernist approach to architecture applying experimental design and urbanistic innovations to their projects The book examines 24 buildings and projects that illustrate Mecanoo's contribution to the creation of new types of collective residences those geared toward integrating functions other than those of mere living within the home This extensively illustrated presentation vividly conveys the experimental and functional aspects of Mecanoo's unique vision and offers an affordable introduction to their work *Annual Report of the Administrator for ...* United Nations Development Programme, 1979 **Making Water Security** Hermen Smit, 2019-12-09 This book examines Nile water security through the morphology of the river it uses the always changing form of the river as a theoretical and empirical device to map and understand how infrastructures and discourses dynamically interact with the Nile By bringing a history of two centuries of dam development on the Nile in relation with the drainage of a hill slope in Ethiopia on the one hand and irrigation reform in Sudan on the other the author shows how the scales, units and populations figuring in projects to securitize the river emerge through the rearrangement of its water and sediments The analysis of Making water security is more than yet another story of how modern projects of water security have legitimized often violent dispossessions of Nile land and water It shows how no water user is confined by the roles assigned by project engineers and planners As ongoing modern development of the river reduces the prospects for new large diversions of water the targeted subjects of development and modernization make use of newly opened spaces to carve out their own projects They creatively mobilize old irrigation and drainage infrastructures in ways that escape the universal logic of water security **Red River Delta Master Plan: River morphology**, 1994 Red River Delta Master Plan: Environmental survey, 1994 **Architectural Publications Index**, 2002 International Seminar on Urban Culture Arte-Polis, 2006 *The Architects' Journal*, 2001 **Red River Delta Master Plan: Agro-processing**, 1994 **Red River Delta Master Plan: Water resources planning**, 1994
