these practices for their own professional and classroom development Drawing on a diverse range of books and including practical advice on how to set up and run a book club each book club session covers The rationale for choosing that title An interview with the author with accompanying visual notes A summary of the key ideas Key takeaways and implications for classroom practice With an accompanying website featuring the video interviews and additional resources accessible at <https://glt.alwayslearning.co.uk/posts/glt-friends-book-club-edu-book-club> this will be a valuable resource for teachers and school leaders at all stages of their careers

**Visible Learning** John Hattie, 2008-11-19 This unique and ground breaking book is the result of 15 years research and synthesises over 800 meta analyses on the influences on achievement in school aged students It builds a story about the power of teachers feedback and a model of learning and understanding The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning Areas covered include the influence of the student home school curricula teacher and teaching strategies A model of teaching and learning is developed based on the notion of visible teaching and visible learning A major message is that what works best for students is similar to what works best for teachers an attention to setting challenging learning intentions being clear about what success means and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand Although the current evidence based fad has turned into a debate about test scores this book is about using evidence to build and defend a model of teaching and learning A major contribution is a fascinating benchmark dashboard for comparing many innovations in teaching and schools

Teaching, 1926      **Objectives of teaching** Henry Clinton Morrison, 1924      **A Contemporary Theory of Mathematics Education Research** Tony Brown, 2020-10-05 This book by passes both psychology and sociology to present an original social theory centered on seeing mathematical learning by everyone as an intrinsic dimension of how mathematics develops as a field in support of human activity Here mathematics is defined by how we collectively talk about it Drawing on psychoanalytic theory the student is seen as participating in the renewal of mathematics through their contributions to our collective gaze on mathematics as the field responds to ever new demands As such learning takes a critical stance on the standard initiations into current practices often promoted by formal education In the field of mathematics education researchers have moved from psychology where individual students were seen as following natural paths of development through existing mathematical knowledge to socio cultural models predicated on students being initiated into the human world and understood through the reflective gazes this world has of itself such as those found in comparisons of student learning in different countries This book addresses the domain purpose and functioning of contemporary research in mathematics education and is an original contribution to this theme The book is aimed at a mathematics education research audience It continues a dialogue with existing publications seen widely as a cutting edge and will also be of interest to students and practitioners in the fields of qualitative research social theory and psychology
