Material Fluxes On The Surface Of The Earth:

Material Fluxes on the Surface of the Earth National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Board on Earth Sciences and Resources, 1994-02-01
Understanding the ebb and flow of materials on the earth's surface is vital to comprehending environmental change. We need to differentiate between those that represent a progression of natural events from those that might be human induced. The latter can be managed by changing policies; the former probably cannot. This volume presents what researchers know and do not know about the base or natural level of surficial fluxes and their dynamics. Leading experts in the field offer a historical perspective on geofluxes and discuss the cycles of materials on the earth's surface from weathering processes to the movement of material through the river system and oceans to their deposition. The committee sets research directions in five areas: shallow water studies, mapping rates of change, sample dating, and most critical, understanding whether human influence can exceed the natural variability in geoflux processes. This volume will be important reading for geophysical scientists, researchers, faculty, and students as well as environmental policymakers. **Fluxes** Rector Press, Limited, 1995-10-01

Palaeohydrology and Environmental Change G. Benito, Victor R. Baker, K. J. Gregory, 1998-12-04
Paleohydrology is the study of how the composition, distribution, and movement of water have influenced environmental change over time. Using in-depth case studies from North America, Europe, Asia, and Australia, this book explores paleohydrological reconstruction and its implications on past and future environmental change. *Analysis of Materials Flown on the Long Duration Exposure Facility* H.
