Material World Metal:

Materials World ,2000 The Mining World ,1910 Material World Ed Conway,2023-11-07 THE NEW YORK TIMES BOOK REVIEW EDITORS CHOICE AN ECONOMIST BEST BOOK OF THE YEAR Sand salt iron copper oil and lithium These fundamental materials have created empires razed civilizations and fed our ingenuity and greed for thousands of years Without them our modern world would not exist and the battle to control them will determine our future Finalist for the Financial Times and Schroders Business Book of the Year Award The fiber optic cables that weave the World Wide Web the copper veins of our electric grids the silicon chips and lithium batteries that power our phones and cars though it can feel like we now live in a weightless world of information what Ed Conway calls the ethereal world our twenty first century lives are still very much rooted in the material In fact we dug more stuff out of the earth in 2017 than in all of human history before 1950 For every ton of fossil fuels we extract six tons of other materials from sand to stone to wood to metal And in Material World Conway embarks on an epic journey across continents cultures and epochs to reveal the underpinnings of modern life on Earth traveling from the sweltering depths of the deepest mine in Europe to spotless silicon chip factories in Taiwan to the eerie green pools where lithium originates Material World is a celebration of the humans and the human networks the miraculous processes and the little known companies that combine to turn raw materials into things of wonder This is the story of human civilization from an entirely new perspective the ground up Minerals Today ,1991 The Social Life of Materials Adam Drazin,Susanne K  chler,2020-06-08 Materials play a central role in society Beyond the physical and chemical properties of materials their cultural properties have often been overlooked in anthropological studies finished products have been perceived as social yet the materials which comprise them are considered raw or natural The Social Life of Materials proposes a new perspective in this interdisciplinary field Diverting attention from the consumption of objects the book looks towards the properties of materials and how these exist through many transformations in a variety of cultural contexts Human societies have always worked with materials However the customs and traditions surrounding this differ according to the place the time and the material itself Whether or not the material is man made materials are defined by social intervention Today these constitute one of the most exciting areas of global scientific research and innovation harboring the potential to act as key vehicles of change in the world But this materials revolution has complex social implications Smart materials are designed to anticipate our actions and needs yet we are increasingly unable to apprehend the composite materials which comprise new products Bringing together ethnographic studies of cultures from around the world this collection explores the significance of materials by moving beyond questions of what may be created from them Instead the text argues that the materials themselves represent a shifting ground around which relationships identities and powers are constantly formed and dissolved in the act of making and remaking **Countless Sands** Jeffrey Moser,Jason Protass,2024-12-31 Countless Sands presents engaging analyses of the diverse relationships between Buddhism and the

environment that existed in medieval Asia Recent years have witnessed a surge in publications across the humanities that advance powerful ethical and political arguments to account for the human failure to respond effectively to global climate change While the contributors to this volume are attuned to this challenge rather than present explicit political arguments they pursue a subtler effort to historicize the environment as a site and subject of Buddhist practice while providing research grounded in rigorous analysis of complex and fragmentary sources The volume thereby mitigates against the Orientalist East West binaries that have long informed the invocation of Buddhism in Euro American environmental discourses As the chapters collectively demonstrate there was no singular consistently Buddhist understanding of the natural world but innumerable varied engagements preserved in discrete texts images and artifacts Through specific case studies the authors consider such questions as How did premodern Buddhists understand what we today call the environment How did they think about their earth How when and where did the various processes of the earth actually impinge on the practices of historical Buddhists What kinds of environmental imaginations informed specific Buddhist practices In so doing the authors explore the connections between the ways in which historical Buddhist communities interacted with their environments and how they understood those environments In the broader field of Buddhist studies Countless Sands contributes to ongoing efforts to expand the locus of inquiry from textually based investigations of Buddhist doctrine to a broader examination of the complex and varied place of Buddhism in the lives of historical communities The book furthers this broader process by casting it in environmental terms and will engage readers looking for models of thought provoking historical analysis on environmental themes

Materials Engineering ,1930 **Maps of Meaning** Jordan B. Peterson,2002-09-11 Why have people from different cultures and eras formulated myths and stories with similar structures What does this similarity tell us about the mind morality and structure of the world itself From the author of 12 Rules for Life An Antidote to Chaos comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals myths and religious stories have long narrated A cutting edge work that brings together neuropsychology cognitive science and Freudian and Jungian approaches to mythology and narrative Maps of Meaning presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind **Metals and Materials** ,1978

The Pan-American Magazine ,1922 The World's Sages, Infidels and Thinkers, Being Biographical Sketches, Etc.

With a Portrait. De Robigne Mortimer BENNETT,1876 **Serials Holdings in the Linda Hall Library** Linda Hall
