

"The clearest, simplest, most entertaining, and best book yet on the art of calculating in your head."

—Morton Keller, author of *Mathematical Wonders* (Simon & Schuster) and *Calculus: A Very Short Introduction*

# MATH MAGIC

## HOW TO LOOK LIKE A GENIUS WITHOUT REALLY TRYING

.....

Arthur Benjamin, Ph.D., and  
Michael Brant Shermer, Ph.D.

Foreword by  
James "The Amazing" Randi

# Mathemagics How To Look Like A Genius Without Really Trying

**American Mathematical Society**

## **Mathemagics How To Look Like A Genius Without Really Trying:**

*Mathemagics* Arthur Benjamin, Arthur Benjamin, Ph.D., Founding Publisher Michael Shermer, 1994-04 Secrets of lightning calculation and how to perform mind boggling mental feats

## **Mathemagics: A Magical Journey Through Advanced Mathematics - Connecting More Than 60 Magic Tricks To High-level Math**

Ricardo V Teixeira, Jang-woo Park, 2020-05-29 This delightful book connects mathematical concepts in a dozen areas to magic tricks Expositions of the mathematics precede description and analysis of the tricks The expositions are too short for in depth learning the intent is to give sophomores a taste of the content and ideas of later mathematics courses Each chapter features exercises on the mathematics and students can have fun practicing the tricks Mathematics Magazine Teixeira and Park present over 60 different magic tricks while introducing students to high level math areas Readers will learn really interesting ideas that will better prepare them for future courses and help them finding areas they might want to study deeper And as a side effect students will learn amazing magic tricks century old secrets and details from famous magicians and mathematicians The material was written to quickly present key concepts in several mathematical areas in direct way Little or no proficiency in math is assumed In fact students do not require any Calculus knowledge And since chapters are almost independent from each other this book also work as introduction to several other courses Topics covered include mathematical proofs probability abstract algebra linear algebra mathematical computing number theory coding theory geometry topology real analysis numerical analysis and history of math

**Integrating Literature in the Content Areas** Sharon Kane, 2017-05-12 This practical accessible resource will help future and practicing teachers integrate literature into their middle school or high school classrooms while also addressing content area standards and improving the literacy skills of their students Two introductory chapters are followed by five chapters that each cover a different genre Chapter 3 Informational Books Chapter 4 Fiction Chapter 5 Biography Autobiography and Memoir Chapter 6 Poetry and Chapter 7 How to and Hands on Books Each genre chapter consists of four parts Part 1 Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills Part 2 Offers hands on instructional strategies and activities using literature with activities for use in a variety of disciplines Part 3 Presents individual author studies three or four per chapter with bibliographies and guidelines for using the authors books in content area courses Part 4 Features an annotated bibliography of specially selected children and young adult literature for that genre organized by content area The annotations provide information about the book which can be used to prepare booktalks and teaching ideas for using in a specific content area Altogether these sections contain more than 600 annotated entries tabbed by subject area including art English language arts languages and culture math and technology music PE health science and social studies history [The Borderlands of Science](#) Michael Shermer, 2001-05-17 As author of the bestselling *Why People Believe Weird Things* and *How We Believe* and Editor in Chief of *Skeptic* magazine Michael Shermer has emerged as the nation's number one scourge of

superstition and bad science Now in *The Borderlands of Science* he takes us to the place where real science such as the big bang theory borderland science superstring theory and just plain nonsense Big Foot collide with one another Shermer argues that science is the best lens through which to view the world but he recognizes that it s often difficult for most of us to tell where valid science leaves off and borderland science begins To help us Shermer looks at a range of topics that put the boundary line in high relief For instance he discusses the many theories of everything that try to reduce the complexity of the world to a single principle and shows how most fall into the category of pseudoscience He examines the work of Darwin and Freud explaining why one is among the great scientists in history while the other has become nothing more than a historical curiosity He also shows how Carl Sagan s life exemplified the struggle we all face to find a balance between being open minded enough to recognize radical new ideas but not so open minded that our brains fall out And finally he reveals how scientists themselves can be led astray as seen in the infamous Piltdown Hoax Michael Shermer s enlightening volume will be a valuable aid to anyone bewildered by the many scientific theories swirling about It will help us stay grounded in common sense as we try to evaluate everything from SETI and acupuncture to hypnosis and cloning

**25 Creationists' Arguments & 25 Evolutionists' Answers** Michael Shermer,1994 *The Arithmetic Teacher* ,1993 *Math Horizons* ,1993 How is

My Sixth Grader Doing in School? Jennifer Jacobson,Dottie Raymer,2000 How can I help my child in math if I don t understand the problems myself I know my child is old enough to take responsibility for her own schoolwork but she seems more disorganized than ever What can I do What can I do to make sure my child is prepared for middle school and beyond When your child entered sixth grade you may have breathed a sigh of relief thinking that you no longer needed to coach your child in basic reading and math skills But parental involvement is more important than ever for the sixth grader Academics are getting tougher Expectations are higher Children who have glided through school up until now may run into difficulties A good reader begins to groan when given a reading assignment A fine math student dissolves into tears over a sheet of division problems Don t worry *How Is My Sixth Grader Doing in School* will help you find out what your child knows what your child needs to know and how to work with your child to ensure success in school

**Notices of the American Mathematical Society** American Mathematical Society,1993 *The Skeptical Inquirer* ,1993 **Teaching Mathematics**

**in Secondary and Middle School** James S. Cangelosi,2003 For courses in secondary or middle school math This text focuses on all the complex aspects of teaching mathematics in today s classroom and the most current NCTM standards It demonstrates how to creatively incorporate the standards into teaching along with inquiry based instructional strategies Using one expansive case study that follows a mathematics teacher through his first year in the profession the text illustrates how to lead pupils toward meaningful mathematics and strategies for developing mathematics skills Interactive in its approach the text includes an abundance of illustrative examples mini case studies cooperative learning activities field based activities and transitional activities The Library Journal ,1993-10 Includes beginning Sept 15 1954 and on the 15th of

each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately     **Forthcoming Books** Rose Arny,1998-06     **Subjects Matter** Harvey Daniels,Steven Zemelman,2004 Lively practical and irreverent Subjects Matter points the way to activities and materials that energize content and engage students across all subject areas     *The Writers Directory 2008* Michelle Kazensky,2007-06 Features bibliographical biographical and contact information for living authors worldwide who have at least one English publication Entries include name pseudonyms addresses citizenship birth date specialization career information and a bibliography     *Library Journal* ,1993     **The New Book of Popular Science: Astronomy, space science, mathematics, past and future** ,2004     *The Writers Directory* ,2013     *The British National Bibliography* Arthur James Wells,2003     *Mathematics Teaching in the Middle School* ,1994
